Hacking Tim Jordan, 2013-05-03 Hacking provides an introduction to the community of hackers and an analysis of the meaning of hacking in twenty first century societies On the one hand hackers infect the computers of the world entering where they are not invited taking over not just individual workstations but whole networks On the other hackers write the software that fuels the Internet from the most popular web programmes to software fundamental to the Internet's existence Beginning from an analysis of these two main types of hackers categorised as crackers and Free Software Open Source respectively Tim Jordan gives the reader insight into the varied identities of hackers including Hacktivism hackers and populist politics Cyberwar hackers and the nation state Digital Proletariat hacking for the man Viruses virtual life on the Internet Digital Commons hacking without software Cypherpunks encryption and digital security Nerds and Geeks hacking cultures or hacking without the hack Cybercrime blackest of black hat hacking Hackers end debates over the meaning of technological determinism while recognising that at any one moment we are all always determined by technology Hackers work constantly within determinations of their actions created by technologies as they also alter software to enable entirely new possibilities for and limits to action in the virtual world Through this fascinating introduction to the people who create and recreate the digital media of the Internet students scholars and general readers will gain new insight into the meaning of technology and society when digital media are hacked Towards Advanced Data Analysis by Combining Soft Computing and Statistics Christian Borgelt, María Ángeles Gil, João M.C. Sousa, Michel Verleysen, 2012-08-29 Soft computing as an

engineering science and statistics as a classical branch of mathematics emphasize different aspects of data analysis. Soft computing focuses on obtaining working solutions quickly accepting approximations and unconventional approaches. Its strength lies in its flexibility to create models that suit the needs arising in applications. In addition, it emphasizes the need for intuitive and interpretable models which are tolerant to imprecision and uncertainty. Statistics is more rigorous and focuses on establishing objective conclusions based on experimental data by analyzing the possible situations and their relative likelihood. It emphasizes the need for mathematical methods and tools to assess solutions and guarantee performance. Combining the two fields enhances the robustness and generalizability of data analysis methods while preserving the flexibility to solve real world problems efficiently and intuitively. In today's rapidly advancing digital era, the application of machine learning in various business aspects has become a crucial key in driving innovation and success. *Combining Machine Learning and Business* is designed to provide deep insights into how the integration of machine learning and business strategy can bring about significant transformation. This book not only elaborates on concepts and theories but further takes the reader on an applied research journey that has been undertaken. The author of this book, Yusep Maulana, has spent months conducting in depth research on the application of machine learning technology in business, with a particular focus on case studies in Switzerland and the Netherlands. Through hands on experience and direct collaboration with business practitioners in both countries, Yusep has managed to gather valuable data and insights on how machine learning can be integrated into business processes to enhance efficiency, innovation, and competitive advantage. This book presents the results of that research in an accessible way to readers, whether they are academics, business practitioners,

students or anyone with an interest in the field of machine learning and its application in the business world It is hoped that readers will gain a broader and more applied understanding of the potential and challenges in combining machine learning with business strategy
