currently discussed in drama based foreign and second language methodology The first is goal oriented asking whether the acquisition of accuracy or fluency is more important and whether a controlled learning through imitation or an open through improvisation learning environment is more efficient The second issue concerns using drama in language teaching either its use is process oriented where drama becomes an immediate medium for language learning or product oriented where it becomes primarily the reason for language learning The book outlines the theoretical frameworks of both issues and introduces personal narrative comparative observation and analytical reflection illuminating opportunities for learning at both ends of the seemingly contradictory poles of both issues *Play in Healthcare for Adults* Alison Tonkin, Julia
