**Dr. Timothy Zahar, Bs. Lê Trọng Đại**

## Freebookspot Virus:

*La cuarta revolución* Gino Roncaglia, 2016-11-01 La cuarta revolución rene reflexiones que tienen como punto de partida la certeza de que estamos viviendo una verdadera revolución equiparable a la gutemberguiana la cuarta después del paso de la oralidad a la escritura del rollo al cédex y del manuscrito al libro impreso. Cuál es el destino del libro. Qué representan las nuevas tecnologías para la cultura del libro. Son en realidad una oportunidad. Pensando como lecciones con la carga pedagógica que ello implica este libro forma parte de un corpus fundamental para comprender la relación entre los libros y las nuevas tecnologías sin caer en condenas infundadas ni elogios facilistas. **Download!** [icon] **No.11** PCuSER [icon], 2009-07-28

**Virus** William Harrington, 1991 **Viral** Matt Ridley, Alina Chan, 2022-06-28 Chan and Ridley write with an urgency that inspires gripping depictions of what viruses are how infectious disease laboratories work and wonderfully lucid descriptions of bats. They powerfully recount how dangerous pathogens can both leak from a lab and emerge in nature. New York Times Book Review. Understanding how Covid 19 started is crucial for the future of humankind. Viral is the most incisive and authoritative book about the search for the source of the virus. A new virus descended on the human species in 2019 wreaking unprecedented havoc. Finding out where it came from and how it first jumped into people is an urgent priority but early expectations that this would prove an easy question to answer have been dashed. Nearly two years into the pandemic the crucial mystery of the origin of SARS CoV 2 is not only unresolved but has deepened. In this uniquely insightful book a scientist and a writer join forces to try to get to the bottom of how a virus whose closest relations live in bats in subtropical southern China somehow managed to begin spreading among people more than 1 500 kilometres away in the city of Wuhan. They grapple with the baffling fact that the virus left none of the expected traces that such outbreaks usually create: no infected market animals or wildlife, no chains of early cases in travellers to the city, no smouldering epidemic in a rural area, no rapid adaptation of the virus to its new host human beings. To try to solve this pressing mystery Viral delves deep into the events of 2019 leading up to 2021: the details of what went on in animal markets and virology laboratories, the records and data hidden from sight within archived Chinese theses and websites and the clues that can be coaxed from the very text of the virus's own genetic code. The result is a gripping detective story that takes the reader deeper and deeper into a metaphorical cave of mystery. One by one the authors explore promising tunnels only to show that they are blind alleys until miles beneath the surface they find themselves tantalisingly close to a shaft that leads to the light. **Virus** Richard Preston, 1995 **Virus 2.0** Norah S. Bernard, 2007-08-14 A petite red-headed computer whiz with a shady past discovers a COMPUTER VIRUS that is FATALLY INFECTING COMPUTER USERS all over the country. The Center for Disease Control in Atlanta dubs it CompuFlu. But other computer users are affected in a totally different way: they discover that they have STRANGE NEW POWERS. All are beset by frightening nightmares of a wizened old creature they call The Gray Man.

Ultimately it is he who beckons them to the Smoky Mountains of North Carolina where they all meet and learn the fate he has planned for them and for the WORLD

**Virus** Elizabeth Silberman, 2019-12-26 I try to clean up all the blood but he pushes me away He tells me to go find some place safe I plead with him that he s not safe but it falls upon deaf ears Anger boils in me and I hit him before walking away briskly Let s move past this grim chapter let s start anew

**Gone Viral** David J Schmidt, 2020-12-30 This first book in the Gone Viral series contains stories about the origins of the virus When a new virus spreads quickly across the world it s only natural for us to try and figure out where it came from As of the time of writing scientists from the World Health Organization are still looking into the exact source of Covid 19 The mystery surrounding its origins lends itself to rumors and legends While scientists have been studying the virus for months and can debunk many theories outright the fact remains that we do not know exactly where and how human infection started We may never know And so the origin myths have continued to circulate Many of these stories are dramatic almost cinematic in nature Some of them seem to have been penned by some imaginative Hollywood screenwriter For this reason I ve decided to retell them here in the dramatic style of a summer blockbuster Like so many of the stories that Hollywood tells us these urban legends are filled with misleading ideas misrepresentations of other cultures simplified views of science and sinister government plots Entire nations are reduced to ridiculous caricatures These myths are sophomoric and over the top exaggerated and absurd If any one of them were made into a film adaptation Nicholas Cage would be great for the lead role So grab the popcorn find a comfy seat and settle in Let the show begin

**Breathless** David Quammen, 2022 A NEW YORK TIMES BOOK OF THE YEAR 2022 and FINANCIAL TIMES BEST BOOK OF 2023 Shortlisted for the Royal Science Society Book Prize 2023 From the author of the prescient Spillover Animal Infections and the Next Human Pandemic Breathless is the story of the scientific quest to decipher control and fight Covid 19 Breathless traces SARS CoV 2 s fierce journey through the human population as seen by the scientists who study its origin ever changing nature and capacity to kill It shows how strange viruses emerge as we disrupt wild ecosystems sometimes causing global catastrophe and suggests this coronavirus could be a forever virus that s destined to bedevil us endlessly Quammen also explains that experts saw this pandemic coming that scientists warned the next big one would be caused by a changeable new virus but were ignored for political or economic reasons and that while the origins of this virus may not be known for years some suppositions are compelling and others can be dismissed Breathless takes us inside the frantic international effort to control SARS CoV 2 as if peering over the shoulders of the brilliant scientists who led the chase Praise for Spillover A frightening and fascinating masterpiece of science reporting Walter Isaacson A real life thriller with an outcome that affects us all Elizabeth Kolbert

**Pathogens Versus the People** Jeremy Farrar, Anjana Ahuja, 2021-07 The Coronavirus pandemic has devastated lives and livelihoods around the world and continues to do so These personal tragedies will and must be told and heard There is however also a truthful and objective scientific narrative to be written about how the virus played out and how the world set about dealing with it Spike is that

story from the inside Its author Jeremy Farrar is one of the UK s leading scientists and a member of the SAGE emergency committee As head of the Wellcome Trust and an expert in emerging infectious diseases Jeremy Farrar was one of the first people in the world to hear about a mysterious new respiratory disease in China and to learn that it could readily spread between people Farrar describes how it feels as one of the key scientists at the sharp end of a fast moving situation when complex decisions must be made quickly amid great uncertainty His book casts light on the UK government s claims to be following the science in its response to the virus and is informed not just by Farrar s views but by interviews with other top scientists and political figures Farrar who has spent his career on the frontlines of epidemics including Nipah virus in Malaysia bird flu in Vietnam and Ebola in West Africa also reflects on the wider issues of Covid 19 the breath taking scientific advances in creating tests treatments and vaccines the challenge to world leaders to respond for the global good and the need to address inequalities that hold back success against the virus All these shape how the world ultimately fares not just against Covid 19 but against all the major health challenges we face globally

**Purrfect Virus** Nic Saint,2024-03-10 *Going Viral* When our humans started getting sick and before long fell into a deep coma we frankly feared for our lives especially when the disease took out half of Hampton Cove s population and for a moment it looked as if the four of us were the last ones standing As it was the members of the neighborhood watch had been spared and so Gran Scarlett Wilbur and Father Reilly took it upon themselves to find out what was going on Especially when it transpired that the virus was man made and certain dark forces had launched it with a specific and nefarious goal in mind And so four senior citizens and their seven cats

began a campaign to bring our town back from the brink and thwart the conspiracy that had put our loved ones in the hospital And with Gran at the helm let s just say we were in for one bumpy ride
