**Freedom from Government** Trent Goodbaudy,2012-01-13 Exert your birthright to obtain freedom from corrupt government agencies and their jurisdiction Freedom from Government How to Reclaim Your Power is your handbook for dealing with government on your terms Learn how to win any court case what to say to law enforcement the problem with attorneys and why you NEVER want to hire one why statute and legislation only apply to you if you allow it the difference between a right and a privilege what it means to be truly free and responsible for yourself and your estate the history of our legal system and why it is so messed up how to get remedy for inherent rights violations and everything else you will need to make them LEAVE YOU ALONE FOREVER     Marriage: What Christians Should Know Creation Liberty Evangelism,Christopher J.E. Johnson,2013-09-16 What a Christian needs to understand about modern marriages before they jump in head first     The Rebirth of Mankind Trent Goodbaudy,2012-04-28 20% of all proceeds from this title are going to Morgellons research An introduction to transhumanism genetics nanotechnology AI informatics synthetic biology DNA the atmosphere electricity and what mankind has to look forward to in the future From the back cover While we were recovering from the tragedy of September 11 2001 the global powers that be were making plans for humanity that were so large and so sweeping they needed to keep the general public in the dark about exactly what they were planning As humanity on Earth enters a new century and millennium we look forward to such advancements as immortality convergence of the mind with computers bionic augmentation super soldiers for fighting new wars nano bots that help keep us healthy and even hybridization of our DNA to allow humanity to achieve things that we never thought possible With the rapid advancement of new technology such as genetics nanotechnology artificial intelligence synthetic biology and electronics we soon will be able to augment and change our very bodies at the molecular level The convergence of these technologies spell out some exciting prospects for the future but at the same time there exists a danger so great that extinction of every living organism on the planet could be closer than we think We must be aware of our past to know where the future leads and we must not remain apathetic Ignorance is not bliss it is terminal Awareness is the cure     *How to Reclaim your Power* Hans Liszika,2012-05-11 In our modern and fast moving world and lives more and more people are being left behind in the race for physical riches by those that have more than they can spend in this lifetime and thus live in conditions which are generally described as being poor or even below the poverty line and because of their longing for some luxuries and often bare necessities the poorer people become trapped into the credit card and loan systems on offer borrowing and buying often beyond their means enticed too by the many advertisements in the printed media and on TV telling them they can have everything they want now and pay for it later by borrowing up to the limits or against the equity of their homes often for goods or services they do not really need or want Others again take out mortgages to buy expensive homes beyond their means or ability to repay the often over valued and priced homes At times also through their sheer ignorance people are

unaware of the consequences of their often impulsive actions and motives The reason for this in many cases is they are so involved in running their lives trying to make ends meet that they have no time to look outside the proverbial square Others again become involved in activities such as compulsive gambling drinking and smoking which consume a large proportion of their disposable income In our modern world it is also becoming more evident through the almost daily exposure of corrupt officials crooked trades people unethical businesses industries and service providers that honesty and ethics seem to have disappeared and have been replaced by the terminology me me me and profit profit profit at any cost People have to become more and more vigilant and aware of what is going on around them and protect them selves by whatever means available to them from the impact these outside influences have on their finances lives families and relationships Consequently many when realizing what is happening try to turn their lives around to break out of this vicious cycle of monetary enslavement but due to the circumstances they find themselves in very few actually can see a way out of their misery or manage to do something about it Many in their despair seek outside help by attending seminars and workshop that promise them they will change their lives and circumstances and more often than not pay enormous amounts of money to secure a seat at these sessions and when one listens to some of the talk it sounds quite logical and believable but does it work During the session people get all fired up heading for home to turn into practice what they have learned only to find that after e few weeks their situations and conditions have not changed leaving them with a feeling of disappointment and helplessness about their situation The facts are nothing will change unless people themselves make a personal effort commit them selves too and have the desire to make the changes and to see them through A favored saying which is often used is that you must believe you already have what you desire otherwise it cannot come into your life But how can you believe in something you know and through your eyes you can see it not to be true because in the process of co creation your mind is playing a very important part and when you can only see the opposite around you day after day and when whatever you try does not work how can you believe you already have what you want or desire Consequently when this happens people become disillusioned and start to believe that they have no power over what happens in their lives and many even stop trying altogether The contents of the book are based on events situations and conditions which actually occurred in the author s life and are happening to the average working families in Australia and world wide on a daily basis in their lives Through observations made media reports and personal situations encountered Hans descri
