Julia Seton, 2018-11-19 In the beginning was the word and the word was with God and the word was God And the word was made flesh and dwelt among us and we beheld his glory full of grace and truth Ever since the birth of the human race there have been health and disease Everywhere we find those who live at levels of comprehension that cannot express in flesh the perfect power of the word and these must by natural law take on the form of whatever they have power to comprehend Health is man s immortal birthright it is eternal in the universal plan and it can be made to become eternal in the life of men in just the hour they understand the laws of their own being There are two expressions of energy in the universe one is called the constructive the other the destructive the one builds up the other tears down This must forever be so for only as matter is destroyed and passed back into energy can the energy pass out again into finer forms *FREEDOM TALKS NO. II* JULIA

SETON, M.D., 1915-01-01 Ever since the birth of the human race there have been health and disease Everywhere we find those who live at levels of comprehension that cannot express in flesh the perfect power of the word and these must by natural law take on the form of whatever they have power to comprehend Health is man s immortal birthright it is eternal in the universal plan and it can be made to become eternal in the life of men in just the hour they understand the laws of their own being There are two expressions of energy in the universe one is called the constructive the other the destructive the one builds up the other tears down This must forever be so for only as matter is destroyed and passed back into energy can the energy pass out again into finer forms Living in these great universal currents of construction and destruction man relates himself constantly with one or both through the simple law of his own consciousness and only as he learns the laws of his own being and consciously places himself in a position of power can he ever hope to escape the results which the negative destructive currents produce in his body and his environment Today we know that the world in which we live is nothing but a

great sea of energy which in the undifferentiated is called God and in the differentiated is called matter or form or to make it more simple we can call one the energy that creates and the other the things created from and by this energy Man and his environment are created by this energy He is a localized center of force and he becomes the expression in form of just whatever he relates with under the law of cosmic correspondence We have found that this great energy is also intelligence and is nothing but mind with its various manifestations We know today that the atoms of the atmosphere are intelligence and as they touch one another throughout space it is through this atomic mind that messages are carried and currents are generated which can heal patients at a distance Everything in the universe is in a state of intelligent association and when the atoms become expressed in human form they pass into that expression of the universal mind known as human consciousness All human life is simply different tastes of consciousness brought about by the different vibratory rates to which our atoms respond      Freedom Talks No. II Julia Seton,2018-08-16 Freedom Talks No II by Julia Seton In the beginning was the word and the word was with God and the word was God And the word was made flesh and dwelt among us and we beheld his glory full of grace and truth Ever since the birth of the human race there have been health and disease Everywhere we find those who live at levels of comprehension that cannot express in flesh the perfect power of the word and these must by natural law take on the form of whatever they have power to comprehend Health is man s immortal birthright it is eternal in the universal plan and it can be made to become eternal in the life of men in just the hour they understand the laws of their own being There are two expressions of energy in the universe one is called the constructive the other the destructive the one builds up the other tears down This must forever be so for only as matter is destroyed and passed back into energy can the energy pass out again into finer forms We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience      **Freedom Talks No. II** Julia Seton,2024-03-04 Reproduction of the original The publishing house Megali specialises in reproducing historical works in large print to make reading easier for people with impaired vision      *Kindness to Animals; Or, The Sin of Cruelty Exposed and Rebuked* Charlotte Elizabeth,2019-12-17 In Kindness to Animals Or The Sin of Cruelty Exposed and Rebuked Charlotte Elizabeth offers a poignant and impassioned discourse on animal welfare framing her arguments within the core ethos of moral philosophy and Christian ethics Through eloquent prose she interweaves a call for compassion with a critique of

societal norms that condone cruelty illustrating the moral ramifications of humanity's treatment of animals The book is steeped in the Victorian values of the time yet its timeless themes of empathy and responsibility resonate profoundly across generations pushing readers to examine their own ethical obligations toward non human beings Charlotte Elizabeth a pioneering advocate for animal rights in the 19th century utilized her voice not just as a writer but as a moral crusader drawing from her profound religious convictions and personal experiences Her commitment to social justice is evident throughout her oeuvre as she sought to elevate the discourse surrounding both human and animal compassion This background informs her passionate plea for kindness revealing the intersection of personal belief and societal responsibility I highly recommend this seminal work to those interested in animal rights ethics and Victorian literature Elizabeth's compelling arguments and poetic style not only provoke thought but also inspire action making it a crucial read for anyone who seeks to understand the moral imperatives surrounding our treatment of animal life **Freedom Talks JULIA.**
