Gender And International Security Feminist Perspectives Routledge Critical Security Studies:

Gender and International Security Laura Sjoberg, 2009-10-16 This book defines the relationship between gender and international security analyzing and critiquing international security theory and practice from a gendered perspective. Gender issues have an important place in the international security landscape but have been neglected both in the theory and practice of international security. The passage and implementation of UN Security Council Resolution 1325 on Security Council operations, the integration of gender concerns into peacekeeping, the management of refugees, post conflict disarmament and reintegration and protection for non combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security. This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally in order to demonstrate the importance of gender analysis to the study of international security and to expand the feminist research program in Security Studies. The chapters included in this book not only challenge the assumed irrelevance of gender, they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue. Rather the contributors argue that gender is conceptually, empirically and normatively essential to studying international security. They do so by critiquing and reconstructing key concepts and theories in international security by looking for the increasingly complex roles women play as security actors and by looking at various contemporary security issues through gendered lenses. Together these chapters make the case that accurate, rigorous and ethical scholarship of international security cannot be produced without taking account of women's presence in or the gendering of world politics. This book will be of interest to all students of critical security studies, gender studies and International Relations in general. Laura Sjoberg is Assistant Professor of Political Science at the University of Florida. She has a Phd in International Relations and Gender Studies from the University of Southern California and is the author of *Gender Justice and the Wars in Iraq* (2006) and with Caron Gentry *Mothers Monsters Whores Women's Violence in Global Politics* (2007).

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years, scholars, policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment. Concepts such as environmental security and resource conflict have been used to hint at these significant linkages. While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts, there has been little examination of the intersection between approaches to environmental security and gender. This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies. It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions. By adopting a feminist environmental security discourse, this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections. Case studies evaluate if and how environment and

security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

The Unforgotten Women of the Islamic State Gina Vale, 2024-09-11 The Unforgotten Women of the Islamic State explores the governance of the Islamic State IS terrorist organization through the lives and words of local Iraqi Syrian and Kurdish women While the roles and activities of foreign predominantly Western pro IS women have garnered significant attention the experiences and insights of local civilian populations have been largely overlooked Drawing on the testimonies of 63 local Sunni Muslim and Yazidi women Gina Vale exposes the group's intra gender stratified system of governance Eligibility for the group's protection security citizenship and entrance into the semi public sphere were not universal but required convergence with the gender norms of IS through permanent erasure or at least temporary disguise of certain markers of difference In some cases this was directed by a pre meditated divide and conquer strategy while in others it manifested as unregulated violence at the hands of individual group members including women The structure follows the trajectory of IS's increasing control over its citizens and captive populations its militarization of society imposition of law and order provision of goods and services and intervention in civilians private lives Analysis of diverse first hand accounts and the group's documentation reveals that the presence exclusion and victimization of local civilian women were necessary to the functioning and legitimization of IS's caliphate project and the supremacy of affiliated men and women As a fledgling proto state IS needed local Iraqi Syrian and Kurdish women Though far from represented or protected they were by no means forgotten

Critical Approaches to International Security Karin

M. Fierke, 2015-03-06 During the Cold War the concept of international security was understood in military terms as the threat or use of force by states. The end of East West hostilities however brought critical perspectives to the fore as scholars sought to explain the emergence of new challenges to international stability such as environmental degradation, immigration and terrorism. The second edition of this popular and highly respected text offers a wide ranging and comprehensive analysis of the growing field of critical security studies. All the chapters have been fully revised and updated to map the on going evolution of debates about international security since 1989 including the more recent shift in emphasis from critiques of the realist practices of states to those of global liberal governance. Topics covered include the relationship between security and change, identity, the production of danger, fear and trauma, human insecurity and emancipation. The book explores the meaning and use of these concepts and their relevance to real life situations ranging from the War on Terror to the Arab Spring, migration, suffering in war, failed states and state building and the changing landscape of the international system with the emergence of a multipolar world and the escalation of global climate change. Written with verve and clarity and incorporating new seminar activities and questions for class discussion, this book will be an invaluable resource for students of international relations and security studies.

Gender and Private Security in Global Politics Maya Eichler, 2015 For two hundred years the provision of military security has been a central and defining function of the modern nation state. The increasing reliance on private military and security companies in contemporary conflict marks a fundamental transformation in the organization of military violence and it raises issues of accountability and ethics that are of particular concern to feminists. This privatization of force not only enables states to circumvent citizens' democratic control over questions of war and peace but also undermines women's and minority groups' claims for greater inclusion in the military sphere. **Gender and Private Security in Global Politics** brings together key scholars from the fields of international relations, security studies and gender studies to argue that privatization of military security is a deeply gendered process. The chapters employ a variety of feminist perspectives including critical postcolonial, poststructuralist and queer feminist perspectives as well as a wide range of methodological approaches including ethnography, participant observation, genealogy and discourse analysis. This is the first book to develop an extended feminist analysis of private militaries and to draw on feminist concerns regarding power, justice and equality to consider how to reform and regulate private forces.

Gender, UN Peacebuilding, and the Politics of Space Laura J. Shepherd, 2017 The United Nations Peacebuilding Commission UNPBC was established in December 2005 to develop outlines of best practice in post conflict reconstruction and to secure the political and material resources necessary to assist

states in transition from conflict to peacetime. Currently the organization is involved in reconstruction and peacebuilding activities in six countries. Yet a 2010 review by permanent representatives to the United Nations found that the hopes of the UN peacebuilding architecture despite committed and dedicated efforts had yet to be realized. Two of these hopes relate to gender and power specifically that peacebuilding efforts integrate a gender perspective and that the Commission consult with civil society NGOs and women's organizations. This book is the first to offer an extensive and dedicated analysis of the activities of the UN Peacebuilding Commission with regard to both gender politics broadly conceived and the gendered dynamics of civil society participation in peacebuilding activities. Laura J Shepherd draws upon original fieldwork that she conducted at the UN to argue that the gendered and spatial politics of peacebuilding not only feminizes civil society organizations but also perpetuates hierarchies that privilege the international over the domestic realms. The book argues that the dominant representations of women, gender and civil society in UN peacebuilding discourse produce spatial hierarchies that paradoxically undermine the contemporary emphasis on bottom up governance of peacebuilding activities.

Positive Security Gunhild Hoogensen Gjørsvig, Ali Bilgic, 2022-06-09. This book critically conceptualises positive security and explores multiple areas in global politics where positive security can be studied as an alternative to the existing understandings and practices of security. Structured through a framework on the practice and ethics of everyday security, the book defines positive security as a focal point of contextual and spatiotemporal moments that emerge through encounters with the other in everyday politics. In these moments an actor can show attentiveness and humility towards the other. In this book the authors present their own understandings of positive security offering an in depth discussion and analysis of the Global North and South, delving into many aspects such as human security, migration, gender, Indigenous issues and perceptions of security in the Arctic and challenges and tensions for and within NATO. The book concludes by reflecting on the significance of positive security looking at its application for other current issues including how to understand and manage new in security challenges including hybrid threats and warfare. This book will be of interest to students and scholars of international relations, critical security and peace studies.

Gender, Violence and Security Laura Shepherd, 2013-07-04. How do understandings of the relationships between gender, violence, security and the international inform policy and practice in which these notions are central? What are the practical implications of basing policy on problematic discourses? In this highly original poststructural feminist critique the author maps the discursive terrains of institutions both NGOs and the UN which formulate and implement resolutions and guides of practice that affect gender issues in the context of international policy practices. The author investigates UN Security Council Resolution 1325 passed in 2000 to address gender issues in conflict areas in order to examine the discursive construction of security policy that takes gender seriously. In doing so she argues that language is not merely descriptive of social political reality but rather constitutive of it. Moving from concept to discourse and in turn to practice the author analyses the ways in which the resolution's discursive construction

had an enormous influence over the practicalities of its implementation and how the resulting tensions and inconsistencies in its construction contributed to its failures The book argues for a re conceptualisation of gendered violence in conjunction with security in order to avoid partial and highly problematic understandings of their practical relationship Drawing together theoretical work on discourses of gender violence and international security sexualised violence in war gender and peace processes and the domestic international dichotomy with her own rigorous empirical investigation the author develops a compelling discourse theoretical analysis that promises to have far reaching impact in both academic and policy environments

Gendering Global Conflict Laura Sjoberg, 2013-08-06 Laura Sjoberg positions gender and gender subordination as key factors in the making and fighting of global conflict Through the lens of gender she examines the meaning causes practices and experiences of war building a more inclusive approach to the analysis of violent conflict between states Considering war at the international state substate and individual levels Sjoberg's feminist perspective elevates a number of causal variables in war decision making These include structural gender inequality cycles of gendered violence state masculine posturing the often overlooked role of emotion in political interactions gendered understandings of power and states mistaken perception of their own autonomy and unitary nature Gendering Global Conflict also calls attention to understudied spaces that can be sites of war such as the workplace the household and even the bedroom Her findings show gender to be a linchpin of even the most tedious and seemingly bland tactical and logistical decisions in violent conflict Armed with that information Sjoberg undertakes the task of redefining and reintroducing critical readings of war's political economic and humanitarian dimensions developing the beginnings of a feminist theory of war

Ontological security and securitisation theory. Part II, *Issues*, examines how these various theoretical approaches have been put to work in critical considerations of environmental and planetary security, health, human security, and development, information technology and warfare, migration and border security, in security and the everyday, and terror, risk, and resilience. The historical and geographical scope of the book is deliberately broad, and each of the chapters in Part II concretely illustrates one or more of the approaches discussed in Part I, with clear internal referencing allowing the text to act as a holistic learning tool for students. Methodologies in Critical Terrorism Studies Alice E. Finden, Carlos Yebra López, Tarela Ike, Ugo Gaudino, Samwel Oando, 2024-01-04. This interdisciplinary book presents an intervention into methodological practices in the subfield of Critical Terrorism Studies and features established and early career scholars. The volume interrogates the role that research methods play in shaping the sub-discipline of Critical Terrorism Studies (CTS). It responds to two major methodological gaps within CTS: 1) the dearth of Global South cases and voices, and decolonial and feminist approaches; and 2) the lack of engagement with traditional disciplines and quantitative methods. Together, the authors demonstrate that interdisciplinary methodological dialogues can open up new possibilities for researchers seeking pathways towards and definitions of emancipation, social justice, and freedom from violence. Simultaneously, the book shows that by focusing on the possibilities that methodologies open up to us, and by maintaining a commitment to reflexive practice, we expand our understandings of what are legitimate and acceptable forms of research, thus challenging the Critical Terrorism Studies divide. The chapters draw upon a wide range of empirical cases, including Nigeria, Kenya, France, Brazil, and the UK, focusing on three key issues within Critical Terrorism Studies: its own relationship with and perpetuation of epistemic violence, decolonial/postcolonial, Global South, feminist, and queer approaches, and more traditional approaches and methods, as a means to interrogate the methodological binary between Critical Terrorism Studies and Terrorism Studies. This book will be of much interest to students of critical terrorism studies, counterterrorism, security studies, and International Relations in general.
