Genealogies Of Religion Discipline And Reasons Of Power In Christianity And Islam:

Genealogies of Religion Talal Asad, 1993-08-18 In *Genealogies of Religion* Talal Asad explores how religion as a historical category emerged in the West and has come to be applied as a universal concept The idea that religion has undergone a radical change since the Christian Reformation from totalitarian and socially repressive to private and relatively benign is a familiar part of the story of secularization It is often invoked to explain and justify the liberal politics and world view of modernity And it leads to the view that politicized religions threaten both reason and liberty Asad's essays explore and question all these assumptions He argues that religion is a construction of European modernity a construction that authorizes for Westerners and non Westerners alike particular forms of history making Christianity, Islam, and Orisa-Religion J.D.Y. Peel, 2016 A free ebook version of this title is available through Luminos University of California Press's open access publishing program for monographs Visit www.luminosoa.org to learn more The Yoruba of southwestern Nigeria are exceptional for the copresence among them of three religious traditions Islam Christianity and the indigenous orisa religion In this comparative study at once historical and anthropological Peel explores the intertwined character of the three religions and the dense imbrication of religion in all aspects of Yoruba history up to the present For over 400 years the Yoruba have straddled two geocultural spheres one reaching north over the Sahara to the world of Islam the other linking them to the Euro American world via the Atlantic These two external spheres were the source of contrasting cultural influences notably those emanating from the world religions However the Yoruba not only imported Islam and Christianity but also exported their own orisa religion to the New World Before the voluntary modern diaspora that has brought many Yoruba to Europe and the Americas tens of thousands were sold as slaves in the New World bringing with them the worship of the orisa Peel offers deep insight into important contemporary themes such as religious conversion new religious movements relations between world religions the conditions of religious violence the transnational flows of contemporary religion and the interplay between tradition and the demands of an ever changing present In the process he makes a major theoretical contribution to the anthropology of world religions Religion, Law and Power Ishita Banerjee-Dube, 2009-07-01 This book constructs an anthropological history of a subaltern religious formation Mahima Dharma of Orissa a large province in eastern India Tracking the contingent making of a critical community over a hundred and forty year period *Religion Law and Power* explores the interplay of distinct expressions of time and history innovative reformulations of caste and Hinduism and distinct engagements with state and nation This serves to unravel the wider entanglements of religion history law modernity and power **Religion, Language, and Power** Nile Green, Mary Searle-Chatterjee, 2008-07-15 *Religion Language and Power* shows that the language of religion is far from neutral and that the packaging and naming of what English speakers call religious groups or identities is imbued with the play of power Religious Studies has all too often served to amplify voices from other centers of power whether scripturalist or otherwise normative and dominant This book's de

centering of English classifications goes beyond the remit of most postcolonial studies in that it explores the classifications used in a range of languages including Arabic Sanskrit Chinese Greek and English to achieve a comparative survey of the roles of language and power in the making of religion In contextualizing these uses of language the ten contributors explore how labels are either imposed or emerge interactively through discursive struggles between dominant and marginal groups In dealing with the interplay of religion language and power there is no other book with the breadth of this volume

Experiments with Power J. Brent Crosson, 2020-07-17 In 2011 Trinidad declared a state of emergency This massive state intervention lasted for 108 days and led to the rounding up of over 7 000 people in areas the state deemed crime hot spots The government justified this action and subsequent police violence on the grounds that these measures were restoring the rule of law In this milieu of expanded policing powers protests occasioned by police violence against lower class black people have often garnered little sympathy But in an improbable turn of events six officers involved in the shooting of three young people were charged with murder at the height of the state of emergency To explain this the host of Crime Watch the nation's most popular television show alleged that there must be a special power at work obeah From eighteenth century slave rebellions to contemporary responses to police brutality Caribbean methods of problem solving spiritual work have been criminalized under the label of obeah Connected to a justice making force obeah remains a crime in many parts of the anglophone Caribbean In *Experiments with Power* J Brent Crosson addresses the complex question of what obeah is Redescribing obeah as science and experiments Caribbean spiritual workers unsettle the moral and racial foundations of Western categories of religion Based on more than a decade of conversations with spiritual workers during and after the state of emergency this book shows how the reframing of religious practice as an experiment with power transforms conceptions of religion and law in modern nation states

Civil Islam Robert W. Hefner, 2011-05-21 Civil Islam tells the story of Islam and democratization in Indonesia the world's largest Muslim nation Challenging stereotypes of Islam as antagonistic to democracy this study of courage and reformation in the face of state terror suggests possibilities for democracy in the Muslim world and beyond Democratic in the early 1950s and with rich precedents for tolerance and civility Indonesia succumbed to violence In 1965 Muslim parties were drawn into the slaughter of half a million communists In the aftermath of this bloodshed a New Order regime came to power suppressing democratic forces and instituting dictatorial controls that held for decades Yet from this maelstrom of violence repressed by the state and denounced by conservative Muslims an Islamic democracy movement emerged strengthened and played a central role in the 1998 overthrow of the Soeharto regime In 1999 Muslim leader Abdurrahman Wahid was elected President of a reformist civilian government In explaining how this achievement was possible Robert Hefner emphasizes the importance of civil institutions and public civility but argues that neither democracy nor civil society is possible without a civilized state Against portrayals of Islam as inherently antipluralist and undemocratic he shows that Indonesia's Islamic reform movement repudiated the goal of an

Islamic state mobilized religiously ecumenical support promoted women's rights and championed democratic ideals This broadly interdisciplinary and timely work heightens our awareness of democracy's necessary pluralism and places Indonesia at the center of our efforts to understand what makes democracy work

Islam, Society, and Politics in Central Asia Pauline Jones, 2017-07-20 During the 1990s there was a general consensus that Central Asia was witnessing an Islamic revival after independence and that this occurrence would follow similar events throughout the Islamic world in the prior two decades which had negative effects on both social and political development Twenty years later we are still struggling to fully understand the transformation of Islam in a region that's evolved through a complex and dynamic process involving diversity in belief and practice religious authority and political intervention This volume seeks to shed light on these crucial questions by bringing together an international group of scholars to offer a fresh perspective on Central Asian states and societies The chapters provide analysis through four distinct categories the everyday practice of Islam across local communities state policies toward Islam

focusing on attempts to regulate public and private practice through cultural legal and political institutions and how these differ from Soviet policies how religious actors influence communities in the practice of Islam state policies towards the religion and subsequent communal responses to state regulations and how knowledge of and interaction with the larger Islamic world is shaping Central Asia s current Islamic revival and state responses The contributors a multidisciplinary and international group of leading scholars develop fresh insights that both corroborate and contradict findings from previous research while also highlighting the problem of making any generalizations about Islam in individual states or the region As such this volume provides new and impactful analysis for scholars students and policy makers concerned with Central Asia

Religion in Liberal Democracy as a Form of Life Christoph Baumgartner, 2024-12-03 Religion in Liberal Democracy as a Form of Life advances a theory to deal with the challenges connected to the liberal democratic ideal that all people are free to codetermine the future of their society and equally entitled to their religion and beliefs given the historical bias towards Christianity in politics and culture within many European societies Religious diversity and social and political participation are in fact fiercely contested issues Critical scholars from philosophy and cultural theory contest that liberal political theories of freedom of religion can adequately deal with issues connected to an increasingly diversified and secularized religious field in historically Christian societies Consequently they claim that politics based on such theories cannot deliver on the promise to ensure conditions that allow all members of society equal religious freedom and political participation By outlining historical developments and by closely examining case studies of recent controversies about religious diversity in Germany and the Netherlands this book identifies shortcomings of the currently predominant liberal account of freedom of religion or belief Based on this analysis the author proposes a more complex theory of liberal democracy as a form of life with religion and religious freedom as components of it This takes into account that informal norms social structures and predominant notions of belonging can function as powerful obstacles to freedom and equality even if formal legal and political institutions prohibit discrimination based on religion Construing liberal democracy as a form of life that is as a set of social practices attitudes and their institutional manifestations and material expressions shifts the focus of critical analysis from the law to informal structures and components This provides an understanding of the dynamics of culturalized religion in society which has often been missing in political philosophical theories The theory proposed in this book provides normative criteria for building liberal democracies that are tolerant with respect to religious differences and solidaric in terms of ensuring conditions that allow all members of society to codetermine as equals the future of society irrespective of their religion or beliefs This book will appeal to scholars of political theory social and political philosophy religious studies sociology and anthropology

Islam and Democracy in the Maldives Azim Zahir, 2021-11-29 This book examines Islam s relationship to democratization in the Indian Ocean nation of the Maldives It explores how and why an electoral democracy based in a constitution that has many liberal features but also Islam based limitations especially lack of

religious freedom emerged in the country by 2009 In doing so the book interrogates a major approach to Muslim politics that assumes reformist interpretations of Islam are a positive and even a necessary force for liberalization and democratization in Muslim majority contexts This book shows reformist Islam did play certain positive roles in democratization in the Maldives However the book suggests reformist Islam may not be an invariably uncontroversial force in the space of politics It argues that modern nation building in the Maldives shaped by political actors with reformist Islamic orientations since around the 1930s has also completely transformed Islam as a modern institutional and discursive political religion These transformations of Islam as a modern political religion have existed as path dependent constraints on the depth of democratization ensuring religion based limitations and intensifying controversy over religion vis vis the state and individual rights An original empirical contribution towards a better understanding of Islam and politics in the Maldives this book will be of interest to academics and students working on democracy and Islam in particular and in the fields of political science and area studies especially South Asian politics

of Disenchantment and Secularization Robert A. Yelle, Lorenz Trein, 2020-09-17 What does it really mean to be modern The contributors to this collection offer critical attempts both to re read Max Weber's historical idea of disenchantment and to develop further his understanding of what the contested relationship between modernity and religion represents The approach is distinctive because it focuses on disenchantment as key to understanding those aspects of modern society and culture that Weber diagnosed This is in opposition to approaches that focus on secularization narrowly construed as the rise of secularism or the divide between religion and politics and that then conflate this with modernization as a whole Other novel contributions are discussions of temporality meaning the sense of time or of historical change that posits a separation between an ostensibly secular modernity and its religious past and of the manner in which such a sense of time is constructed and disseminated through narratives that themselves may resemble religious myths It reflects the idea that disenchantment is a narrative with either Enlightenment Romantic or Christian roots thereby developing a conversation between critical studies in the field of secularism such as those of Talal Asad and Gil Anidjar and conceptual history approaches to secularization and modernity such as those of Karl L with and Reinhart Koselleck and in the process creates something that is more than merely the sum of its parts

Taking 'Religion' Seriously: Essays on the Discursive Study of Religion Teemu Taira, 2022-03-16 This book demonstrates through methodological reflections and carefully chosen case studies a new way to conduct study of religion It focuses on how social actors negotiate what counts as religion and how discourses on religion are part of the way in which contemporary societies organise themselves The present volume draws on examples from judicial processes media discourses and scholarly debates related to Wiccans Druids and Jedi knights among others By analysing discourses on religion and building on rather than rejecting genealogical critiques of religion Teemu Taira argues that the study of religion can be constructive and socially relevant

The Iranian Metaphysicals Alireza Doostdar, 2018-03-13 What do the occult sciences's ances with the souls of the dead and appeals to saintly powers have to do with rationality Since the late nineteenth century modernizing intellectuals religious leaders and statesmen in Iran have attempted to curtail many such practices as superstitious instead encouraging the development of rational religious sensibilities and dispositions However far from diminishing the diverse methods through which Iranians engage with the immaterial realm these rationalizing processes have multiplied the possibilities for

metaphysical experimentation The Iranian Metaphysicals examines these experiments and their transformations over the past century Drawing on years of ethnographic and archival research Alireza Doostdar shows that metaphysical experimentation lies at the center of some of the most influential intellectual and religious movements in modern Iran These forms of exploration have not only produced a plurality of rational orientations toward metaphysical phenomena but have also fundamentally shaped what is understood as orthodox Shi i Islam including the forms of Islamic rationality at the heart of projects for building and sustaining an Islamic Republic Delving into frequently neglected aspects of Iranian spirituality politics and intellectual inquiry The Iranian Metaphysicals challenges widely held assumptions about Islam rationality and the relationship between science and religion

The Awakening of Muslim Democracy Jocelyne Cesari, 2014-04-14 Why and how did Islam become such a political force in so many Muslim majority countries In this book Jocelyne Cesari investigates the relationship between modernization politics and Islam in Muslim majority countries such as Egypt Iraq Pakistan Tunisia and Turkey countries that were founded by secular rulers and have since undergone secularized politics Cesari argues that nation building processes in these states have not created liberal democracies in the Western mold but have instead spurred the politicization of Islam by turning it into a modern national ideology Looking closely at examples of Islamic dominance in political modernization this study provides a unique overview of the historical and political developments from the end of World War II to the Arab Spring that have made Islam the dominant force in the construction of the modern states and discusses Islam s impact on emerging democracies in the contemporary Middle East
