

GENERAL INFORMATION

The Chemetron Fire Systems Beta Series Systems are automatic suppression systems using the FM-200 chemical agent and consisting of four basic components and their associated accessories.

- FM-200 Components
- Control Panels
- Detection and Alarm Devices
- Completer Kits

Features

- 1** The FM-200 components consists of agent containers, container supports (racks), and discharge nozzles.
- 2** The control panel is the brains of the system and is used to monitor the detection and accessories.
- 3** The detection, alarm devices, and accessories are the external devices that act as the eyes and voice of the system as they give audible or visual signals.
- 4** The completer kits consist of warning signs, hoses, connection fittings, pressure gauges or solenoid valves, and the actuator required to operate the cylinder valve.

The system and its components are agency tested for total flooding applications and should be used in accordance with the guidelines contained in National Fire Protection Association Standard 2001. A total flooding application can be defined as injecting FM-200 into an enclosure or volume having the structural integrity to retain the agent during and after discharge. The design of such a system requires that the FM-200 chemical agent be discharged from its container within 10 seconds and be thoroughly mixed throughout the protected volume, reaching a minimum concentration level of 6.25%, but not exceeding 9% in normally occupied spaces.

BETA SERIES SYSTEM EQUIPMENT DESCRIPTION

Cylinder and Valve Assembly

FM-200 is stored in specially designed cylinder assemblies. Beta series cylinders are available in three different capacities and are charged with FM-200 to a filling density up to 70 lb./ft³ (1121 kg/m³) of cylinder volume. All cylinders are superpressurized with dry nitrogen to a pressure of 360 psig (2482 kPa), at 70°F (21°C). Each cylinder is equipped with an identification nameplate indicating the quantity of FM-200.

The standard cylinder assembly, having a rigid dip tube, is designed for mounting in a vertical position only. The cylinder assembly is composed of a cylinder, dip tube, and cylinder valve.

Cylinder Valve - Standby Mode

Cylinder Valve - Actuated Mode
