CHEMISTRY LABORATORY MANUAL

Term 3, 2023

**Before each chemistry lab class**

- Read the whole introduction and experiment.
- Write up the safety information for the chemicals.
- Complete any pre-lab calculations.
- Complete the pre-lab quiz in Moodle.

**Leaving for your lab class**

- Take your lab coat, safety eyewear, calculator and pens, wear enclosed shoes.
- Take (at least) the printed report pages and pages where you have written safety information for the chemicals and any pre-lab calculations.

**At your lab class**

- Arrive on time (20 minutes late lockout).
- Complete the worksheet, experimental work, and report.
- Clean your locker and workspace.
- Submit your report and leave.

You must attend at least 3 out of 4 laboratory classes AND acquire all core lab skills in order to pass the chemistry laboratory component. See the 'Attendance at Laboratory Classes' and 'Assessment of Laboratory Work' section of the Laboratory Manual.

For students doing in-person labs, you will not be allowed into the lab if you:

- have not completed pre-lab work
- don't have safety eyewear, lab coat, and enclosed footwear
- arrive more than 20 minutes after the scheduled start of the lab class

Complete the details below at your first chemistry laboratory class.

**General Chemistry Lab Manual** W. Lin Coker, Kimberly A. Elmore, 2014 General Chemistry I Steven Rowley, 2017-06-16 Introduction to Chemistry Lab Manual Donald Siegel, 2021-07-30 Introduction to Chemistry Lab Manual Siegel, 2007-07-10 *General Chemistry Laboratory Manual* Petra Van-Koppen, 2003 Presents a lab manual for the two semester General Chemistry course This book contains experiments that cover the commonly assigned experiments found in a typical two semester course *General Chemistry Laboratory II* Yan-Yeung Luk, 2015-12-10 CHEM 111 Lab Manual General Chemistry Christofield, 2019-08-12 **General Chemistry Laboratory Manual and Notebook** Philip Borer, 2019-05-28 Chemistry 02 - Introduction to Chemistry Bronx Community College Chemistry Dept., 2014-01-17 General Chemistry: Lab Manual Petra Van Koppen, 2006-12-01 *General Chemistry Laboratory Manual and Notebook* Philip Borer, 2012-08-10 **Laboratory Manual for Principles of General Chemistry** J. A. Beran, Mark Lassiter, 2022-08-16 Laboratory Manual for Principles of General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section **General Chemistry Laboratory Manual** David Vargas, 2014-01-21 **General Chemistry Lab Manual** Beran, 2012-02-01 Chemistry Laboratory Manual Nancy De Luca, 2008-08-15 *Chemistry 1406* Jesse Yeh, 2012-07-20 *General Chemistry Lab Manual* Helen Mango, 2014 LAB MANUAL FOR CHEMISTRY: ATOMS FIRST Gregg Dieckmann, John W. Sibert, 2017-10-31 This laboratory manual presents a curriculum that is organized around an atoms first approach to general chemistry Our motivation for writing this manual is to 1 tap into the natural curiosity present in all of us and provide engaging experiments that students will find interesting 2 emphasize topics that students find particularly challenging in the general chemistry lecture course and 3 create a laboratory environment that encourages

students on occasion to solve puzzles and not just follow recipes All too often students view general chemistry lab as a boring exercise in which an exact set of instructions is followed leading to an answer that in many cases results in a good grade regardless of how much learning has taken place To these students the successful lab is the one that takes the least amount of time Unfortunately a huge opportunity to get students truly turned on to science is missed To us the laboratory represents high stakes ground for engagement and relatively low stakes for grading as the laboratory is typically a single credit course or minor component to the lecture grade Thus while the rigor of the experiments in this manual can be tuned to meet the needs of the instructor our hope is that students will be encouraged to play safely with chemical concepts and laboratory techniques with grades simply being a natural consequence of their laboratory actions To facilitate such a mindset this manual has been written to provide instructors with a weekly tool that can attract and keep student interest while providing important connections to the material covered in an atoms first lecture course Our philosophy student curiosity leads to engagement which leads to discovery which leads to learning The manual is for a freshman level general chemistry laboratory course and serves as an ideal supplement for any atoms first general chemistry textbook such as Chemistry Atoms First by Julia Burdge and Jason Overby It is designed for students at all levels from those seeing chemistry for the first time to chemistry majors

**Foundations of Chemistry in the Laboratory** Morris Hein, Leo R. Best, Robert L. Miner, Judith N. Peisen, 1999-04-18 This is the best selling intro prep chemistry lab manual in the market It is designed to accompany Hein Arena Foundations of College Chemistry 11e but can work for any 1 semester lab course The manual includes 28 experiments which have been tried and tested over many editions These experiments work
