Chemistry Olympiad 2015 Study Guide:

Theory And Problems For Chemistry Olympiad: Challenging Concepts In Chemistry Zhihan Nan, Sheng Zhang, 2019-11-19

This study guide for the Chemistry Olympiad contains summarized concepts and examples in all areas of chemistry. The chapters are arranged in a logical manner and establishes connections between concepts. Undergraduate chemistry concepts are explained clearly. Every equation in physical chemistry is derived and justified while every organic reaction has its reaction mechanism shown and explained without assuming that readers have university level background in the subject. The book also contains original Chemistry Olympiad sample problems that readers may use to test their knowledge. This is a first book of its kind written by Nan Zhihan, International Chemistry Olympiad IChO gold medallist and winner of the International Union of Pure and Applied Chemistry IUPAC Prize for achieving the highest score in the experimental exam and experienced Chemistry Olympiad trainer Dr Zhang Sheng who has served as head mentor of Singapore IChO team for many years. It builds on the experience of both a participant and trainer to help any aspiring Chemistry Olympiad student understand the challenging concepts in chemistry.

How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model *Annual Report American Chemical Society, 2005*
