The British National Bibliography Arthur James Wells,2007 *The Gates of Destiny* John C. Compton,2022-08-19 This book contains a series of commentaries research notes and illustrations selected from the author s amazing research work It shows how the notational values for trigram transposition which change the ancient symbolic language of the I Ching into a simple numerical language were originally derived from the combined symbolic mathematics of the ancient Ho T u The Dragon Horse diagram and the Lo Shu The Tortoise diagram This document provides additional conclusive evidence that the originator s of the I Ching employed a mathematical system developed during the Ch in and Han dynasties which encompassed a formalistic natural philosophy that sought to embrace the entire world in a system of number symbolism In addition the research work contained herein sets out to prove by using mathematical operand gates methodology that the destiny fate of an individual being is dependent upon their own genetic DNA *Pattern Recognition* Gernot A.
