Curriculum-Based Library Instruction Amy Blevins, Megan Inman, 2014-09-26 The rampant nature of technology has caused a shift in information seeking behaviors In addition current trends such as evidence based medicine and information literacy mean that one time instructional sessions cannot provide our patrons with all of the skills they need For this reason many librarians are working to develop curriculum based instruction that is semester long or consisting of many sessions throughout an academic program In addition to teaching librarians are also becoming embedded in the curriculums they support by serving as web based course designers problem based learning facilitators or members of curriculum committees Although it is fairly obvious that library instruction is important and that librarians should be equipped to provide this instruction the majority of ALA accredited programs offer only one course on library instruction the courses are only available as electives and they are often only offered once a year Librarians need to gain their instructional experiences through real life experiences mentors and of course books like this one Many books commonly discuss one shot sessions and provide tips for getting the most out of that type of instruction There are not as many that discuss curriculum based instruction in a section let alone an entire book Curriculum Based Library Instruction From Cultivating Faculty Relationships to Assessment highlights the movement beyond one shot instruction sessions specifically focusing on situations where academic librarians have developed curriculum based sessions and or become involved in curriculum committees This volume describes and provides examples of librarians varied roles in the curriculum of education programs These roles include semester long or multi session instructor web based course designer problem based learning facilitator and member of a curriculum committee In addition to describing the roles that librarians have in supporting curriculum the book describes how to carry out those roles with sections devoted to adult learning theory teaching methods developing learning

objectives and working with faculty to develop curriculum Examples of library sessions devoted to information literacy evidence based practice information literacy and biomedical informatics are included This book is not limited to one mode of delivering information and covers examples of face to face distance and blended learning initiatives
