

2008 AP® PHYSICS 2 EXAM ANSWERS ... NOT RADIALLY PLACED THERE

1. (a) Unbalanced

Because the forces exerted on the spring balance as weights are put on it are not balanced, the force that acts on it is unbalanced. (equal in magnitude and in opposite directions, & whose resultant velocity with respect to the spring balance is zero. If the forces exerted on the system could be shown to be balanced, then the system would be in equilibrium and its velocity would not change.)

(b) Spring is pulling the weight to the right, & the weight is pulling the spring to the left. (or spring is pulling the weight to the left, & the weight is pulling the spring to the right.)

(c) As soon as the spring is stretched, it exerts a force to the right, so that it can return to its natural length. (or spring is pulling the weight to the right.)

(d) When a weight is put on the spring, the spring is pulled down, & the weight is pulled up. (or the spring is pulling the weight down, & the weight is pulling the spring up.)

Implication: For the spring force, direction is important. In addition, the force exerted by the spring is proportional to the displacement from its natural length.

(e) The spring is pulling the weight to the right, & the weight is pulling the spring to the left. (or the spring is pulling the weight to the left, & the weight is pulling the spring to the right.)

2. (a) Because the horizontal and vertical forces acting on the object are equal in magnitude, the object is in static equilibrium. (or the forces acting on the object are balanced.)

(b) Each of the forces exerted on the object is pulling on the object in the opposite direction. (or each of the forces acting on the object is pulling on the object in the opposite direction.)

(c) Each of the forces exerted on the object is pulling on the object in the opposite direction. (or each of the forces acting on the object is pulling on the object in the opposite direction.)

3. (a) Impulse-momentum method: The object is pulled to the right, & the spring is pulled to the left. The spring is pulled to the right, & the object is pulled to the left. The spring is pulled to the right, & the object is pulled to the left. The spring is pulled to the right, & the object is pulled to the left.

The spring is pulled to the right, & the object is pulled to the left. The spring is pulled to the right, & the object is pulled to the left.

(b) The net force acting on the object is zero. (or the net force acting on the object is zero.)

(c) The net force acting on the object is zero. (or the net force acting on the object is zero.)

5. (a) Newton's second law: The object is pulled to the right, & the spring is pulled to the left. The spring is pulled to the right, & the object is pulled to the left.
