Intuitions as Evidence Joel Pust,2021-11-18 First

published in 2000 Starting with Kripke s quotation on intuitive content being philosophic evidence in this essay the author aims to demonstrate how contemporary philosophy relies on intuitions as evidence to explain what intuitions are and show why certain contemporary arguments against the use of intuitions as evidence fail

Believable Evidence Veli

Mitova,2017-05-25 Believable Evidence argues that evidence consists of true beliefs This claim opens up an entirely overlooked space on the ontology of evidence map between purely factualist positions such as those of Williamson and Dancy and purely psychologist ones such as that of Conee and Feldman Veli Mitova provides a compelling three level defence of this view in the first contemporary monograph entirely devoted to the ontology of evidence First once we see the evidence as a good reason metaethical considerations show that the evidence must be psychological and veridical Second true belief in particular allows epistemologists to have everything they want from the concept of evidence Finally the view helps us locate the source of the normative authority of evidence The book challenges a broad range of current views on the ontology of reasons and their normative authority making it a must read for scholars and advanced students in metaethics and epistemology

A Probabilistic Analysis of the Sacco and Vanzetti Evidence Joseph B. Kadane, David A. Schum, 2011-09-26 A Probabilistic Analysis of the Sacco and Vanzetti Evidence is a Bayesian analysis of the trial and post trial evidence in the Sacco and Vanzetti case based on subjectively determined probabilities and assumed relationships among evidential events It applies the ideas of charting evidence and probabilistic assessment to this case which is perhaps the ranking cause celebre in all of American legal history Modern computation methods applied to inference networks are used to show how the inferential force of evidence in a complicated case can be graded The authors employ probabilistic assessment to obtain opinions about how influential each group of evidential items is in reaching a conclusion about the defendants innocence or guilt A Probabilistic Analysis of the Sacco and Vanzetti Evidence holds particular interest for statisticians and probabilists in academia and legal consulting as well as for the legal community historians and behavioral scientists It combines structural and probabilistic ideas in the analysis of masses of evidence from every recognized logical species of evidence Twenty eight charts show the chains of reasoning in defense of the relevance of evidentiary matters and a listing of trial witnesses who provided the evidence References include nearly 300 items drawn from the fields of probability theory history law artificial intelligence psychology literature and other areas

Evidence-Based Validation of Herbal Medicine Pulok K. Mukherjee, 2022-07-12 Evidence Based Validation of

Herbal Medicines Translational Research on Botanicals brings together current thinking and practice in the characterization and validation of natural products. The book describes different approaches and techniques for evaluating the quality, safety, and efficacy of herbal medicine, particularly methods to assess their activity and understand compounds responsible and their probable underlying mechanisms of action. This book brings together the views, expertise, and experiences of scientific experts in the field of medicinal plant research; hence, it will be useful for researchers who want to know more about the natural lead with their validation and also useful to exploit traditional medicines. Includes state-of-the-art methods for detecting, isolating, and performing structure elucidation by degradation and spectroscopic techniques. Highlights the trends in validation and value addition of herbal medicine with different scientific approaches used in therapeutics. Contains several all-new chapters on topics such as traditional medicine-inspired drug development to treat emerging viral diseases, medicinal plants in antimicrobial resistance, TLC bio-profiling, botanicals as medicinal foods, bioprospecting, and bioassay-guided isolation of medicinal plants, immunomodulators from medicinal plants, and more.
