Lamoureux,2008-06-15 In this provocative book evolutionist and evangelical Christian Denis O Lamoureux proposes an approach to origins that moves beyond the evolution versus creation debate Arguing for an intimate relationship between the Book of God s Words and the Book of God s Works he presents evolutionary creation a position that asserts that the Father Son and Holy Spirit created the universe and life through an ordained and sustained evolutionary process This view of origins affirms intelligent design and the belief that beauty complexity and functionality in nature reflect the mind of God Lamoureux also challenges the popular Christian assumption that the Holy Spirit revealed scientific and historical facts in the opening chapters of the Bible He contends that Scripture features an ancient understanding of origins that functions as a vessel to

deliver inerrant and infallible messages of faith Lamoureux shares his personal story and his struggle in coming to terms with evolution and Christianity Like many he lost his boyhood faith at university in classes on evolutionary biology After graduation he experienced a born again conversion and then embraced belief in a literal six day creation Graduate school training at the doctoral level in both theology and biology led him to the conclusion that God created the world through evolution Lamoureux closes with the two most important issues in the origins controversy the pastoral and pedagogical implications How should churches approach this volatile topic And what should Christians teach their children about origins

Unveiling the Ruse Lynne Fox,2022-03-16 Two thousand years ago the apostle Peter wrote in his second epistle that in the last days people would scoff at the notion of Christ s second coming He also wrote that the same would be willingly ignorant of the creator God who made the universe and of the Genesis flood that overtook the entire world True to Peter s prophecy Charles Darwin s theory of evolution has replaced the biblical account of man s origins and the global cataclysm to which Noah was witness has been reduced to a fable However the candor of Genesis is beginning to emerge as scientists find evidences in geology paleontology and genetics painting a different picture than naturalism the same substances which are crowned as scientific proofs of deep time and of goo to you evolution showcase the very catastrophe and the account of creation that secular academia aims to censor Following evidence of the supernatural acting upon the natural one discovers both God and his adversary in their conflict over man But the Word of God has revealed its predetermined end and it may come sooner than many would expect Inversely we might have little reason to fear archaic ideas let the Judeo Christian God be a bygone already some say With our knowledge increasing exponentially our future is bright As scientists unlock the secrets of DNA and develop technology beyond our forefathers wildest dreams humankind may even have a shot at achieving immortality one day leaving worries of heaven and hell behind And considering the vastness of the universe in which we hope to expand there could be intelligent life already among the stars that might one day make contact and aid us in our aspirations or this is all just part of the ruse

nature and you're likely to picture a forest not a freeway But how natural is nature really We live in a world of constructed wildlife reserves rainbow tulips designer babies and cultured meat We control a tomato's biology so precisely you can hardly call it natural anymore Meanwhile our grip on the Internet and the financial markets has grown so slight that they're coming to resemble forces of nature Using countless well-known examples and scientific insights Koert van Mensvoort shows how a technosphere is evolving on top of a biosphere billions of years old He'll take you on an epic journey full of businesses that breathe woods that smell like shampoo and creatures that live on plastic Along the way a totally new view of the natural world will unfurl one that's not only more realistic but infinitely more creative exciting and beautiful To cope with the immense challenges facing the world today we need to go forward not back to nature **THE EMERGENCE AND**

Ecumenical and Confessional Writings Edmund Schlink, 2022-12-12 Although many writings of Edmund Schlink 1903-1984 have been available in English for several decades the publication of the new German edition offered a significant impetus for providing a fresh and more accurate translation of them Matthew L. Becker and his co-translators have consistently translated key terms that occur in all five volumes Also they corrected infelicitous and misleading renderings of Schlink's language into English which more or less happened in all the earlier editions In this second volume Becker provides the first ever English translation of Schlink's dogmatics Representing the culmination of five decades of scholarly work by

one of the most important theologians and ecumenists of the twentieth century Schlink's opus magnum sets forth the basic features of Christian doctrine that all Christian churches hold in common Schlink's Ecumenical Dogmatics thus offers a consistent witness to the living triune God who calls sinners to repentance and faith who acts mightily to save them and who sends them back into the world to share God's gospel and love in word and deed
