Brown, Kevin N. Lala, 2024-10-08 Evolutionary theory is one of the most wide ranging and inspiring scientific ideas and it offers a battery of methods that can be used to interpret human behaviour However researchers disagree about the best ways to use evolution to explore humanity and a number of schools of thought have emerged Sense and Nonsense third edition provides an introduction to the ideas methods and findings of five such schools namely sociobiology human behavioural ecology evolutionary psychology cultural evolution and gene culture coevolution In this revised and updated edition of their successful monograph Brown and Lala provide a balanced and rigorous analysis that scrutinises both the evolutionary arguments and the allegations of the critics carefully guiding the reader through the mire of confusing terminology claim and counter claim and polemical statements This readable and informative introductory book will be of use to undergraduate and postgraduate students for example in psychology anthropology and zoology as well as experts on one approach who would like to know more about the other perspectives and lay persons interested in evolutionary explanations of human behaviour Having completed the book the reader will feel better placed to assess the legitimacy of claims made about human behaviour under the name of evolution and to make judgements as to what is sense and what is nonsense

Epistemological Dimensions of Evolutionary Psychology Thiemo Breyer, 2014-11-04 As psychology and philosophy arose as answers to the eternal question of how the mind works evolutionary psychology has gained ground over recent years as a link between cognitive behavioral and natural science theories of the mind This provocative field has also gathered a wide range of criticisms from attributing too much autonomy to the brain to basing itself on faulty assumptions about our prehistoric past Epistemological Dimensions of Evolutionary Psychology reframes its discipline for the contemporary era correcting common misconceptions and mediating between different schools of thought By focusing on the nature and limits of knowledge and reasoning the essence of epistemology contributors offer fresh insights at the intersection of human cognitive abilities as adaptations and our self perception of knowledge including evolutionary perspectives on altruism depression or the phasing out of human sacrifice This diversity strengthens and vindicates the field as evinced by thought provoking dispatches such as Toward a cognitive philosophy of science Evolutionary media psychology and its epistemological foundation The meme meme revisited Depression as an adaptation Like me a homophily based account of human culture Preparedness to learn about the world evidence from infant research An engaging and often controversial testament to the combined power of evolution and logic Epistemological Dimensions of Evolutionary Psychology will intrigue
