Enterprising Africa explores the future opportunities, challenges, growth areas, and key themes that will shape entrepreneurship in the African continent over the next decade. Entrepreneurship can be the key to unlock resilient growth, but only if it is driven by both socially productive and growth-oriented new businesses. The book considers entrepreneurship as an enabler for socio-economic growth and development in Africa, especially in the context of youth unemployment and increasing youth population for which the traditional and indeed emerging industrial sectors will not be able to produce sufficient jobs to meet demand. Organised around three thematic parts, Part I covers the notion of inclusive growth and the role that entrepreneurs can play supporting this. Part II considers the dynamic between entrepreneurs and the environment since social, economic, and environmental concerns need to build upon each other rather than vie for recognition. Finally, Part III offers chapters exploring policy contexts and the wider institutional ecosystems that need to be developed and enhanced to ensure a strong and vibrant environment for the future entrepreneurs of Africa to thrive. Edited and authored by leading experts in the field, this fascinating text will be of interest to academics as well as students of International Transformational and Social Entrepreneurship and International and African Business. Entrepreneurial New Venture Skills David C.

Skill development features include Entrepreneurial profiles of small business owners, Personal applications for students to apply questions to their new venture or a current business, Global and domestic cases, Elevator pitch assignments which put students in the venture capitalist position, Application exercises, and situations covering specific

text concepts Business plan prompts to help students construct a business plan over the course of a semester Featuring pedagogical tools like review questions and learning outcomes and a full companion website that expands upon skill development and offers instructor resources the third edition of Entrepreneurial New Venture Skills is the perfect resource for instructors and students of entrepreneurship **Digital Entrepreneurship in Africa** Nicolas Friederici, Michel

Wahome, Mark Graham, 2020-07-28 The hope and hype about African digital entrepreneurship contrasted with the reality on the ground in local ecosystems In recent years Africa has seen a digital entrepreneurship boom with hundreds of millions of dollars poured into tech cities entrepreneurship trainings coworking spaces innovation prizes and investment funds Politicians and technologists have offered Silicon Valley influenced narratives of boundless opportunity and exponential growth in which internet enabled entrepreneurship allows Africa to leapfrog developmental stages to take a leading role in the digital revolution This book contrasts these aspirations with empirical research about what is actually happening on the ground The authors find that although the digital revolution has empowered local entrepreneurs it does not untether local economies from the continent's structural legacies Drawing on a five year research project the authors show how entrepreneurs creatively and productively adapt digital technologies to local markets rather than dreaming of global dominance achieving sustainable businesses by scaling based on relationships and customizing digital platform business models for African infrastructure challenge The authors examine African entrepreneurial ecosystems show that African digital entrepreneurs have begun to form a new professional class becoming part of a relatively exclusive cultural and economic elite and discuss the impact of Silicon Valley's mythologies and expectations Finally they consider the implications of their findings and offer recommendations to policymakers and others *Conceptual Richness and Methodological*
