Clinical Neuropsychology Study Guide And Board Review American Academy Of Clinical Neuropsychology:

Clinical Neuropsychology Study Guide and Board Review Kirk Stucky, Michael Kirkwood, Jacobus Donders, Christine Liff, 2020-09-01 Clinical Neuropsychology Study Guide and Board Review Second Edition provides an easy to study volume with sample questions and recommended readings that are specifically designed to help individuals prepare for the ABCN written examination. In addition, this book can be used as a teaching tool for graduate students and trainees at various levels. The book is divided into three sections: Section I Foundations of Clinical Neuropsychology, Section II Fundamentals of Assessment, and Section III Disorders and Conditions. The format is geared toward exam preparation and is much less dense than a typical textbook. Information is provided in a concise, outlined manner with liberal use of bullets, boxes, illustrations, and tables that allow readers to easily review and integrate information into their already established knowledge base. To augment the study guide, a recommended readings list at the end of each chapter provides references to more comprehensive materials considered important or seminal in each topic area. Additionally, the book contains four 125-question mock exams designed to help readers study and prepare for the written exam. The answers to all questions are explained along with appropriate and supportive references. Features include detailed charts and summary tables that facilitate conceptual learning, concise coverage of pediatric, adult, and geriatric issues and conditions, emphasis on critical teaching points relevant to current neuropsychological practice, mock exam questions with answers and references at the end of every chapter relevant to the content, four separate 125-question full-length mock exams with answers and references.

Board Certification in Clinical Neuropsychology Kira E. Armstrong, PhD, ABPP, Dean W. Beebe, PhD, ABPP, Robin C. Hilsabeck, PhD, ABPP, Michael W. Kirkwood, PhD, ABPP, 2019-05-01 Pursuit of board certification through the American Board of Professional Psychology (ABPP) has become a standard expectation for clinical neuropsychologists. At the time this book was published, the American Board of Clinical Neuropsychology (ABCN) was the fastest growing specialty board of ABPP with over 1,000 active members. However, the board certification process is challenging and can be intimidating. The objectives of this book are to demystify the process and provide practical advice for achieving board certification through ABPP/ABCN. To start, benefits of board certification are summarized, and common myths are debunked. Next, individual chapters for each step in the process, as well as a chapter devoted to pursuit of the pediatric subspecialty, provide details about essential elements of the task, the process, the timeline, strategies for success, common pitfalls, and what happens behind the scenes at ABPP/ABCN. Each of these chapters also has tips for trainees and supervisors who want to get a jump on preparing for board certification. Finally, encouragement and guidance for individuals who encounter setbacks at any step along the way are offered.

Textbook of Clinical Neuropsychology Joel E. Morgan, Joseph H. Ricker, 2017-12-06 The first edition of the Textbook of Clinical Neuropsychology set a new standard in the field in its scope, breadth, and scholarship. The second edition comprises authoritative chapters that will both enlighten and challenge readers from across allied fields of neuroscience, whether novice

mid level or senior level professionals It will familiarize the young trainee through to the accomplished professional with fundamentals of the science of neuropsychology and its vast body of research considering the field s historical underpinnings its evolving practice and research methods the application of science to informed practice and recent developments and relevant cutting edge work Its precise commentary recognizes obstacles that remain in our clinical and research endeavors and emphasizes the prolific innovations in interventional techniques that serve the field s ultimate aim to better understand brain behavior relationships and facilitate adaptive functional competence in patients The second edition contains 50 new and completely revised chapters written by some of the profession s most recognized and prominent scholar clinicians broadening the scope of coverage of the ever expanding field of neuropsychology and its relationship to related neuroscience and psychological practice domains It is a natural evolution of what has become a comprehensive reference textbook for neuropsychology practitioners

Ethical Decision Making in Clinical Neuropsychology Shane S. Bush,2018-10-04 The ability to anticipate avoid and resolve ethical conflicts in neuropsychology is a dynamic process that must be developed and maintained over time Ethics codes and professional guidelines are drafted and updated changes in clinical practice occur and new laws are implemented To practice in a manner consistent with the highest ethics principles neuropsychologists must be able to integrate the evolving ethical and legal requirements into their professional activities The primary purpose of this 2nd edition is to review ethical guidelines and literature relevant to clinical neuropsychology that have been published since the first edition of this book was published a decade ago A number of important publications have emerged since the first edition was published including new Specialty Guidelines for Forensic Psychology Standards for Educational and Psychological Testing and position statements practice guidelines by APA e g Assessment of Older Adults with Diminished Capacity co authored with ABA and other professional organizations e g AACN NAN that are directly relevant to neuropsychological practice In addition scholarly publications have contributed knowledge to ethical practice in general e g Knapp s VandeCreek s work on positive ethics which is relevant for and should be applied to neuropsychological practice Additionally book chapters on ethics in subspecialty areas e g pediatric and geriatric neuropsychology mTBI Veterans have advanced our understanding of ethical issues in neuropsychology and should be integrated into a new edition of the book Finally advances in technology and increased use of technology in clinical neuropsychology bring ethical issues and challenges incorporated in the new edition of the book Learning exercises and study questions at the end of the chapters help readers review the main points and check their learning progress

The Neuropsychology Fact-Finding Casebook Kirk J. Stucky PsyD, ABPP,Shane S. Bush PhD, ABPP,2017-01-04 Formal training in clinical neuropsychology introduces trainees to diverse patient populations with a variety of conditions and disorders Learning to competently apply a structured fact finding approach to case conceptualization differential diagnosis and treatment planning is an essential goal at all levels of training This approach provides a valuable exercise and method of examining practitioner competence The structured approach to

case analysis promotes good clinical decision making and exercises based on such an approach can help prepare clinicians for the oral exams that are a part of board certification The Neuropsychology Fact Finding Casebook is a resource for both supervisors and trainees in clinical neuropsychology as well as for clinicians preparing for board certification The volume provides 24 compelling and diverse fact finding cases one for each month of a two year residency Each case is presented in a stepwise fashion presenting problem and referral question background information and patient report behavioral observations and test findings At the end of each case a summary diagnostic impression recommendations and questions are provided to assess reinforce and teach core competencies an outcome section describes what occurred after the full case evaluation is completed and critical teaching points are discussed This Casebook is a standardized approach to fact finding that training programs at various levels can use to help trainees develop such evaluation skills

Cultural Diversity in Neuropsychological Assessment Farzin Irani, 2022-02-27 Cultural Diversity in Neuropsychological Assessment provides a platform for clinical neuropsychologists psychologists and trainees to bridge cultures and speak to each other about the ethnically diverse communities they serve throughout the world It allows readers to peek into their clinical filing cabinets and examine how they worked with diverse individuals from indigenous and migrant communities of Arab Asian European Israeli Latin American and Caribbean Persian Russian Sub Saharan African and North American origin The book first reviews important foundations for working with diverse communities that include key knowledge awareness skills and action orientation It then provides a collection of cases for each cultural geographic region Each section begins with an introductory chapter to provide a bird s eye view of the historical and current state of clinical and research practice of neuropsychology in that region Then each chapter focuses on a specific community by providing surface and deep level cultural background knowledge from the authors unique perspectives A case study is then covered in depth to practically showcase an evaluation with someone from that community This is followed by a summary of key strategic points lessons learned references further readings and a glossary of culture specific terminology used throughout the chapter In the end the appendix provides a list of culturally relevant tests and norms for some communities This ground breaking peer reviewed handbook provides an invaluable clinical resource for neuropsychologists psychologists and trainees It increases self reflection about multicultural awareness and knowledge highlights practical ways to increase cultural understanding in neuropsychological and psychological assessments and sparks further discussion for professional and personal growth in this area

Neuropsychological Conditions Across the Lifespan Jacobus Donders, Scott J. Hunter, 2018-08-16 A unique analysis of the pediatric and adult manifestations of the most common neuropsychological conditions treated in clinical practice

Board Certification in Clinical Neuropsychology Kira E. Armstrong, Dean W. Beebe, Robin C. Hilsabeck, Michael W. Kirkwood, 2008-07-14 The authors demystify the ABPP CN board certification process and provide specific guidance tips recommendations and direction for neuropsychologists ready to pursue the diplomate status through the ABCN The book

complements existing educational information about board certification including materials provided through AACN workshops and the AACN Study Guide All the authors hold ABCN diplomate status having successfully navigated the process within the last five years and are accomplished educators who have trained and mentored numerous colleagues from graduate students and post doctoral fellows to professional peers They are also founding members and part of the leadership council for Be Ready for ABPP in Neuropsychology BRAIN an organization dedicated solely to facilitating completion of the ABPP CN certification process by competent clinical neuropsychologists The authors are thus uniquely qualified to provide essential advice about this potentially intimidating process with empathy wisdom and humor

A Neuropsychologist's Guide to Training Psychometrists Christine S. Ghilain, 2021-12-24 A Neuropsychologist's Guide to Training Psychometrists Promoting Competence in Psychological Testing provides a framework for busy neuropsychologists faced with training their newly hired psychometrist It supplies concrete guidelines and provides a roadmap for training that can be customized to any practice department or clinic setting In this essential resource Dr Christine S Ghilain discusses the role of the psychometrist in various neuropsychological practice settings and provides suggested minimum standards of competence across training domains She dives deeply into the core components of assessment from optimizing testing conditions to standardized test administration to keen observations of behavior and includes coverage of topics such as testing with unique populations behavioral management strategies for challenging situations as well as promoting ongoing competence over time A compilation of several sources of data the book includes excerpts from Dr Ghilain's practice specific psychometry training manual along with advice and illustrative examples from many neuropsychologists and psychometrists who shared their experiences This book is an indispensable guide for neuropsychologists looking to instill high standards of competence in their hired professionals and for those involved in training graduate students who are just learning to administer cognitive tests It is also of interest to other assessment focused professionals looking to enhance their skills and refine their psychological testing knowledge

Validity Testing in Child and Adolescent Assessment Michael Kirkwood, 2015-09-14 Thoroughly covering the why and how of validity testing with children and adolescents this book is edited and written by leaders in the field Feigning or noncredible effort during psychological and neuropsychological assessments can have considerable repercussions for diagnosis treatment and use of resources Practical guidance is provided for detecting and managing noncredible responding including vivid case material The reasons that children may feign during testing are also explored Along with information relevant to all assessment settings the book features specific chapters on educational medical sport related forensic and Social Security Disability contexts
