

INTRODUCTION

You have now invested in an Outboard Motor which has been engineered and built to the highest of quality standards. The heart of this product is powered by the world-famous, Quick-Starting Clinton Engine.

Read this manual thoroughly before operating the motor. You will find the instructions concise and complete in operating instructions and recommendations to assure best in care and performance. As you read the instructions, keep in mind that maximum performance and service depend on the owner or the operator. May we suggest that you practice the step by step instructions to be certain you are familiar and understand each operation.

Periodic servicing will be required. It is recommended that you consult your dealer when service is required. He will be happy to extend his facilities to assure prompt service.

Your purchase of this Outboard Motor adds to a pastime enjoyed by thousands. Therefore, may we suggest that you extend your full co-operation in safe operation and conduct on the water.

BREAK-IN PERIOD

In order to obtain maximum efficiency and service from your Outboard Motor it is recommended that a minimum period of five hours **BREAK-IN** be adhered to. During this period it is first recommended the engine be run at half throttle for a period of one hour, after which it is permissible to increase engine speed gradually to full throttle. During Break-In, follow the fuel mixture and lubrication instructions thoroughly. Do not add extra oil to the fuel mixture during the Break-In Period.

FUEL MIXTURE INSTRUCTIONS

TYPE OF GASOLINE: USE A GOOD GRADE OF REGULAR GASOLINE. Avoid the use of "Ethyl," Premium or leaded gasolines will shorten spark plug life. **MIXING RATIO OF OIL TO GASOLINE:** In a clean container, THOROUGHLY mix one-half pint of (non-detergent SAE30) motor oil to one gallon of REGULAR gasoline.

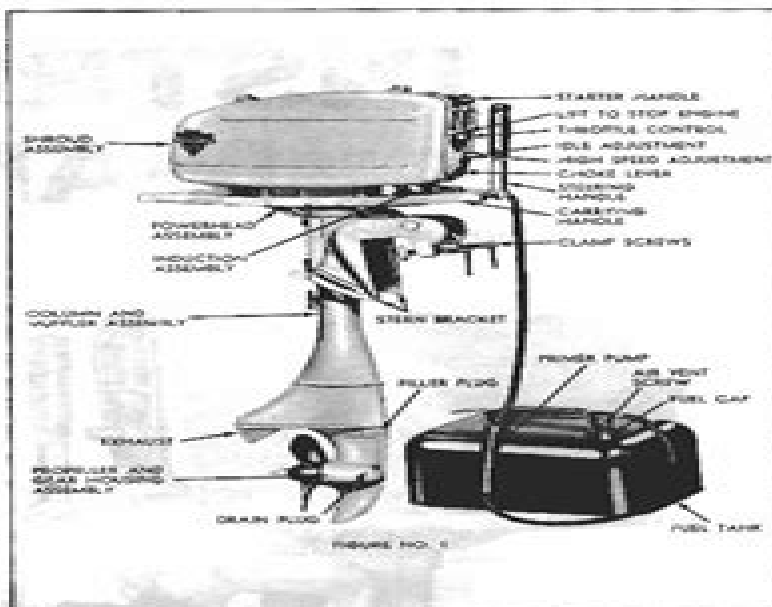

Always filter fuel mixture through a fine mesh screen when filling fuel tank. This important precaution prevents dirt and water from entering the fuel system. Dirty fuel will clog fuel passages and carburetor jets, eventually restricting the flow of fuel to the engine. Water in the fuel will cause erratic engine performance.

CAUTION: Do not use oils containing additives in the fuel mixture. Non-detergent oils when mixed with gasoline give best two-cycle engine lubrication. Use a good grade of oil. Inferior oils cause excessive carbon deposits in the combustion chamber of the engine causing overheating and erratic performance.

LUBRICATION

ENGINE: Lubrication of your Outboard Engine is obtained from the lubricating oil mixed with gasoline. The oil in the fuel mixture being less volatile than the gasoline will remain on the internal bearing surfaces of the engine and will supply sufficient lubrication providing you follow the instructions on Fuel Mixture.

STARTER: Every 10 operating hours remove shroud and oil (a few drops) starter. Oil hole is near center of starter housing. Use SAE 30 motor oil.

GEAR HOUSING:

The Gear Housing should be checked after four hours of operation to make sure it is full of oil. After this initial check, recheck at least every 20 operating hours. If the oil supply is low, fill to level of filler hole. Use a good grade of SAE #90 or an equivalent grade of automotive hypoid gear lubricants. Always drain out the old oil and replenish with new oil at the end of the Outboard Season. This is important, as it removes any water from the Gear Housing and prevents possible corrosion to the internal parts.

Filling the Gear Housing:

1. In filling the gear housing, place the Outboard on its side with filler plug up.
2. Remove upper and lower plugs and tip the Outboard to allow complete drainage of the gear case.
3. Insert grease applicator into filler hole.
4. Force grease into gear housing filler hole until it starts to run out of drain hole.
5. Replace both plugs and place Outboard in upright position.

INSTALLING AND ADJUSTING OUTBOARD TO BOAT

1. Mount the motor on the center of the boat stern board. Secure with clamp screws, **TIGHTEN CLAMP SCREWS BY HAND. DO NOT USE A WRENCH OR OTHER TOOL.**
