Boorstin,1998-12-03 Throughout history from the time of Socrates to our own modern age the human race has sought the answers to fundamental questions of life Who are we Why are we here In his previous national bestsellers The Discoverers and The Creators Daniel J Boorstin first told brilliantly how e discovered the reality of our world and then he celebrated man s achievements in the arts He now turns to the great figures in history

who sought meaning and purpose in our existence Boorstin says our Western culture has seen three grand epics of Seeking First there was the heroic way of prophets and philosophers men like Moses or Job or Socrates Plato and Aristotle as well as those in the communities of the early church universities and the Protestant Reformation seeking salvation or truth from the god above or the reason within each of us Then came an age of communal seeking with people like Thucydides and Thomas More and Machiavelli and Voltaire pursuing civilization and the liberal spirit Finally there was an age of the social sciences when man seemed ruled by the forces of history Here are the absorbing stories of exceptional men such as Marx Spengler and Toynbee Carlyle and Emerson and Malraux Bergson and Einstein These great thinkers still have the power to speak to us not always so much for their answers as for their way of asking the questions that never cease either to intrigue or to obsess us In this impressive climax to a monumental trilogy Daniel J Boorstin once again shows that his ability to present

challenging ideas coupled with sharp portraits of great writers and thinkers remains unparalleled **The Pattern Seekers** Simon Baron-Cohen, 2020-11-10 A groundbreaking argument about the link between autism and ingenuity Why can humans alone invent In *The Pattern Seekers* Cambridge University psychologist Simon Baron Cohen makes a case that autism is as crucial to our creative and cultural history as the mastery of fire Indeed Baron Cohen argues that autistic people have played a key role in human progress for seventy thousand years from the first tools to the digital revolution How Because the same genes that cause autism enable the pattern seeking that is essential to our species's inventiveness However these abilities exact a great cost on autistic people including social and often medical challenges so Baron Cohen calls on us to support and celebrate autistic people in both their disabilities and their triumphs Ultimately *The Pattern Seekers* isn't just a new theory of human civilization but a call to consider anew how society treats those who think differently **Mystery Seekers Club** ST
