Transformations through Exceptional Architecture Nadia Alaily-Mattar,Alain Thierstein,2021-05-30 **Urban** Transformations through Exceptional Architecture focusses on the nexus between architecturally exceptional projects and the city It addresses the following questions How can the complexity of these projects be comprehended What roles do the political contexts play in the commissioning of such projects and what audiences do these projects serve How has the granting of professional recognition for architects changed and what will this change mean to measures of exceptionality in architectural design What roles do the architectural competitions play in the process of commissioning the design of architecturally exceptional projects and do design competitions as an urban planning tool grant high value designs Architecturally exceptional projects are situated in physical urban fabrics How can this situatedness be analysed and what different values does the urban design dimension of these projects add By considering diverse aspects of architecturally exceptional projects the chapters in this book utilise a variety of research methods They bring into dialogue a range of themes regarding the architectural urban design and political aspects of these projects This volume illustrates that multidisciplinary might well be the best strategy to balance the risks of over simplification and the challenges of complexity in analysing these exceptional projects and the city in its ever transformative process The chapters in this book were originally published as a special issue of the Journal of Urban Design **Allied Works Architecture** ,2008 *Learning*

from Failure in the Design Process Lisa Huang, 2020-04-03 *Learning from Failure in the Design Process* shows you that design work builds on lessons learned from failures to help you relax your fear of making mistakes so that you're not paralyzed when faced with a task outside of your comfort zone. Working hands on with building materials such as concrete, sheet metal, and fabric, you will understand behaviors, processes, methods of assembly, and ways to evaluate your failures to achieve positive results. Through material and assembly strategies of stretching, casting, carving, and stacking, this book uncovers the issues, problems, and failures confronted in student material experiments and examines built projects that addressed these issues with innovative and intelligent strategies. Highlighting numerous professional practice case studies with over 250 color images, this book will be ideal for students interested in materials and methods and students of architecture in design studios.

Drawing Imagining Building Paul Emmons, 2019-04-01 *Drawing Imagining Building* focuses on the history of hand drawing practices to capture some of the most crucial and overlooked parts of the process. Using 80 black and white images to illustrate the examples, it examines architectural drawing practices to elucidate the ways drawing advances the architect's imagination. Emmons considers drawing practices in the Renaissance and up to the first half of the twentieth century. Combining systematic analysis across time with historical explication, it presents the development of hand drawing while also grounding early modern practices in their historical milieu. Each of the illustrated chapters considers formative aspects of architectural drawing practice such as upright elevations, flowing lines, and occult lines, and drawing scales to identify their roots in an embodied approach to show how hand drawing contributes to the architect's productive imagination. By documenting some of the ways of thinking through practices of architectural hand-drawing, it describes how practices can enrich the ethical imagination of the architect. This book would be beneficial for academics, practitioners, and students of architecture, particularly those who are interested in the history and significance of hand drawing and technical drawing.

Rocky Mountain Modern John Gendall, 2022-06-28 *Rocky Mountain Modern* is a collection of the most inspiring modern residences in the Rockies, a region with a surprising but deep history of modernist design. *Rocky Mountain Modern* presents the most inspiring modern residences set within the stunning landscapes of the Rockies. Perched on cliffsides or nestled into verdant valleys with expansive picture windows framing breathtaking vistas and natural materials such as wood and stone interpreted in new ways, these striking homes reveal modern living at its best in the mountains. Indeed, modern design has a deep connection to the region: in the 1940s, Aspen, a former mining town in the Colorado Rockies, became an unlikely bastion of modernism, hosting some of the world's leading designers, including Herbert Bayer, Eero Saarinen, Buckminster Fuller, and Victor Lundy. Over the ensuing decades, a regional modernism developed that blended clean lines, open volumes, and glass walls with the natural features of the rocky landscape and a vernacular that had adapted to the extreme environmental conditions. *Rocky Mountain Modern* celebrates this enduring tradition of modernism through the most remarkable residences in the region designed by such architecture studios as Selldorf Architects, Olson

Kundig and Allied Works in Aspen Telluride Vail Sun Valley Jackson Hole and other picturesque locales across the Rocky Mountains from New Mexico to British Columbia *Architecture*, *Architect*, 2007 *Allied Works architecture*

Fernando Aranda Navarro, Graça Correia, Ricardo Merí de la Maza, 2022 This monograph brings together the best of the last two decades of production by the North American studio Allied Works founded by Brad Cloepfil in Oregon in 1994 The name of the studio is an affirmation of architecture understood not as an isolated discipline but as a conversation between diverse creative practices that inspire unique and individual responses In their essay Sitings they reflect on the state of architectural practice and defend the idea of a sensitive architecture which finds its power in the amplification of the forces that inhabit a place Culture topography light climate and plant life are those forces that give buildings lasting meaning His first big project was an adaptive reuse of a Portland warehouse for the Wieden Kennedy advertising agency Since then Allied Works have completed cultural commercial and residential projects including the St Louis Museum of Contemporary Art the University of Michigan Art Museum and the Clyfford Still Museum This book comes at its best showing after more than 25 years of efforts what we want architecture to be sustainable transformable and capable of creating community Provided by publisher
