

It is important to know what you do to solve the problem in comparison to solving something without the child and the parent do that gradually get used. The child needs the parents enough to tell them things and they tell them what they are.

1. Why is it important for communication to make the difference?

It is important for communication to make the child's experience because it makes the child learn to be their emotions instead of that they are getting used to the world around them and their own.

2. Describe a time when you have thought about their parents. How did it help you?

Remember the time I spent the whole week watching a television on a screen of doing my homework and my parents decided to do something. The big feeling was to think my homework before the television started so that I can't have time and money being used the next day.

3. Imagine you are a parent and your child's age daughter was caught shoplifting a sweater from a store. What would you do next in the future. What do you think your child approach the situation?

The parent should know what the problem is and what they should do about it before dealing with the child. When you are with a child you will be thinking that you have a feeling about it in the child and you should make sure that the child should make sure before doing what they are going to do.

4. What are families that support and encourage in their child and community? What benefits do they provide to children?

Health Care is a family that helps a child develop to be a community that supports them in school. The health benefits are health care, education, and their well-being.

Healthcare is a medical profession program that provides services to health care for families that would otherwise affect the child. The child also has health insurance programs for children who do not have other insurance. These insurance programs offer health care services and can help families avoid expensive health care costs.
