Saarinén, Sandra Wall-Reinius, 2021-04-13 Exclusively planned tourism destinations have increased substantially over the last decades As a result gated leisure communities all inclusive resorts private cruise liner owned island and other tourism enclaves are rather common features in tourism especially in the peripheries and low and middle income countries Tourism enclaves can have varied characteristics and scales of operations but typically they involve standardized non local themes or

appeal in their design activities and economies Typically such tourism spaces contain all or a vast majority of facilities and services needed for tourists who have limited possibilities or desires to leave the enclave At the same time the locals access to these spaces is often limited or otherwise regulated Thus enclave tourism spaces are controlled and separated from surrounding communities

Tourism Enclaves Geographies of Exclusive Spaces in Tourism focuses on tourism enclaves in different theoretical and geographical contexts The chapters of the book aim to contribute to our understanding of how these exclusive spaces are created and transformed and how they shape places and place identities The chapters in this book were originally published as a special issue of the journal *Tourism Geographies*
