

The controversy concerning point shooting versus sighted fire is over, and the winner is you. After years of meticulous research, sighted fire expert Andy Stanford and point shooting authority Michael Janich have combined their talents to show you not only how ~~point shooting and sighted~~ fire can coexist, but how

they can be synthesized to yield a superior state-of-the-art shooting technique. The authors first identify the basic skill set that enables shooters to get shots on target using skeletal and centerline alignment rather than muscular coordination. Building upon this foundation, they then introduce the concept of a coarse visual index and finally practical, combat-effective sighted fire. Throughout the process, they highlight the effects and dangers of the real-world threats you may face and teach you the difference between being a shooter, a gunfighter, and a true fighter with a gun. This video includes rare archival footage and little-known insights into the history of modern combat shooting and is must viewing for all serious students of combative pistolcraft.
