First Line Supervisor Of Interview Questions:

Finding the Best and the Brightest Peg Thoms, 2005-07-30 Finding the Best and Brightest proposes an approach to choosing leaders based on a set of criteria designed to align individual qualities with organizational or institutional goals Peg Thoms challenges the popular trend in theory and practice toward transformational or visionary leadership arguing instead that leadership must be developed in context many organizations for example don't need visionaries as much as they need operational leaders who get things done by focusing on present day tasks such as designing superior products and delivering exceptional customer service This book provides guidance for how to recruit select and retain the right people for leadership positions at any level of the organization Drawing from research conducted in the private public and non profit sectors Thoms features powerful examples of effective and ineffective leadership in a variety of situations and sheds light on the complex relationships between leaders and those who follow them We all choose our leaders We hire them to run our companies We vote them into office We appoint them to committees We decide to work for serve and follow them In fact all leadership is relative by taking direction or orders going to bat or war marching behind listening and agreeing we are choosing to allow another individual to lead us Whether the stage is a corporation a country a club a school or any other organization effective leaders matter Yet despite such high profile examples of leadership disasters from the California recall of Gray Davis to the fall of such business titans as Ken Lay and Sam Waksal we continue to choose hire and elect poor leaders Finding the Best and Brightest explores this phenomenon in business politics and other sectors of society and proposes an antidote an approach to choosing leaders based on a set of criteria designed to align individual qualities with organizational or institutional goals Peg Thoms challenges the popular trend toward transformational leadership which focuses on identifying universal characteristics arguing instead that leadership must be developed in context Many organizations for example need operational leaders who can focus on present day tasks such as designing superior products and delivering exceptional customer service and not inspirational or visionary leaders whose otherwise admirable qualities might be ill suited to the challenges at hand Outlining six typical leadership search scenarios from school principal to hospital CEO Thoms shows readers how to identify the traits and behaviors that are most essential for the position and how to structure interviews and other search techniques to elicit the most informative responses and home in on the best candidates She also reminds us that many organizations fail not because they can't find good leaders but because they can't keep them and offers strategies to promote leadership development Whether you are an executive giving the nod to a new department head a concerned citizen casting your vote for a municipal councilman a club member choosing a new president or an aspiring leader deciding which offer will provide the greatest growth opportunities Finding the Best and the Brightest offers fresh insights on the dynamic relationship between leaders and those who follow them

researchers and practitioners alike continue to struggle with the question of how best to decipher and measure an organisation's culture. **Organisational Culture: Concept, Context and Measurement** In Two Volumes aims to encourage an agenda for organisational culture research that gives a renewed emphasis to methodological issues. In pursuit of this aim, consideration is given to both conceptual questions and questions of measurement. In Volume I of the book, the main focus is on the concept of organisational culture. Based on an analysis and critique of existing treatments as well as a comparison of organisational culture with a number of closely related concepts, consideration is given to how the concept might usefully be elaborated and further refined. In Volume II of the book, the focus is on methodological issues. Drawing on the findings of a series of empirical studies conducted over a number of years, consideration is given to what would be required to develop a measure for organisational culture that is practically useful and also capable of accessing culture at its deepest and arguably most influential yet most elusive level. In particular, an approach is advocated that seeks to contextualise organisational culture in terms of various time and experience domains and that also promotes the use of attributions analysis as a means whereby to further understand culture at this level. A valuable resource for scholars and practitioners alike, the book provides readers who are interested in understanding the role and influence of culture in organisations with a comprehensive analysis of the development and application of the organisational culture concept. For readers who are interested in conducting research into the measurement and practical application of organisational culture, the book provides a methodological approach that can be used to guide their research.

The Interview in Staff Appraisal W. E. Beveridge, 2020-04-02 The Interview in Staff Appraisal, first published in 1975, sets out to ensure that the work appraisal is used constructively and within a well-designed system. The book provides personnel and training managers and others responsible for the introduction of an appraisal system into their work organisation with a detailed analysis of the Internal Investigations Frank A. Colaprete, 2007 Throughout the history of law enforcement, the internal investigation process has held the most negative connotation of any investigation conducted by law enforcement personnel. As we progress through the new millennium, the need for efficient and effective law enforcement services and practices grows ever more critical. The goal of this book is to demonstrate this need for proper and complete internal investigations and to teach the entry level and tenured police supervisor the form and function of the internal investigations process. The text selectively focuses on the purposes and practical implications of internal investigations and the pitfalls. The goal is to guide students and professionals through definitions, terminology, legal and labor issues, case law, techniques and procedures, critical and special investigations, including issues in administrative and civil claims. The reader will find a model for conducting internal investigations of police personnel that will allow a police supervisor or commander to perform investigations in a thorough, ethical, legal and equitable manner. This book will meet the needs of attorneys who litigate cases involving allegations of police misconduct as well as representatives of collective bargaining groups who represent police personnel in similar actions. The text ends with

the offering of evidence identification evaluation and collection case review processes risk management training and managing internal investigators and the future trends in internal investigations **Interview Guide for Supervisors** Gary P. Scholick, 1988
