EU Fiscal Federalism Alicia Hinarejos, Robert Schütze, 2023-10-03 Fiscal federalism refers to the division of fiscal powers powers to tax and spend between different levels of government The European Union EU is often seen as a legislative giant on clay feet and one of the principal reasons for this feebleness is the lack of a significant fiscal capacity at the Union level EU Fiscal Federalism Past Present Future explores ten aspects of the EU's fiscal constitution relating both to the fiscal limits it imposes on Member States and the evolution of its own fiscal policy Bringing together an international and distinguished group of scholars this volume analyses the different legal dimensions of

fiscal federalism within the EU from the various aspects of the single market free movement banking union state aid tax harmonization to the EU's budget and Economic and Monetary Union The essays provide a fascinating overview of the topic as well as a detailed analysis of where EU fiscal federalism stands today and how it might develop in the future Sweeping and thorough EU Fiscal Federalism will appeal to academics and students of European Union law as well as to European policymakers

Fiscal Federalism in Multinational States François Boucher, Alain Noël, 2021-07-21 Substate nationalism is often studied as a question of political identity and cultural recognition The same applies to the study of multinational federalism it is mainly conceived as a tool for the accommodation of minority cultures and identities Few works in political philosophy and political science pay attention to the fiscal and redistributive dimensions of substate nationalism and multinational federalism Yet nationalist movements in Western countries make crucial claims about fiscal autonomy and the fair distribution of resources between national groups within the same state In recent years Scottish nationalists have demanded greater tax autonomy Catalan and Flemish nationalists have viewed themselves as unfairly disadvantaged by centralized fiscal arrangements and equalization payments and social transfers in Canada have exacerbated tensions within the federation In Fiscal Federalism in Multinational States contributors from political philosophy and political science disciplines explore the fiscal side of substate nationalism in Canada Belgium the United Kingdom Spain and Australia Chapters examine the connection between secessionist claims and interregional redistributive arrangements power relations in federations where taxing and spending responsibilities are shared between orders of government the relationship between substate nationalism and fiscal autonomy and the role of federal governments in redistributing resources among substate national groups Fiscal Federalism in Multinational States brings together scholars of nationalism and federalism in a groundbreaking analysis of the connections between nationalist claims and fiscal debates within plurinational states

Fiscal Federalism in Canada André Lecours, Daniel Béland, Trevor Tombe, Eric Champagne, 2023-11-30 Featuring insights from some of the top specialists in the country Fiscal Federalism in Canada unpacks numerous complexities of fiscal federalism in Canada The book features key regional and provincial perspectives while taking into account Indigenous realities the three territories and municipal affairs The contributing authors go beyond the major federal transfers to examine the financing of education cities infrastructure and housing This volume shows that fiscal federalism is much more than simply an aggregate of individual programs and transfers It highlights the role of actors other than the federal and provincial governments and recalls the importance of territoriality The book pays close attention to the political dimension of fiscal federalism in Canada which is at the heart of how the federation functions and is essential to its governance Fiscal federalism is central to the funding of critical programs through intergovernmental transfers but it is also the focus of political debates on territorial redistribution In tackling essential questions Fiscal Federalism in Canada contributes to the so called second generation fiscal federalism literature taking stock of the critical sociological and political issues at its core

Fiscal Federalism and Equalisation Transfers, 2025-03-06 This edited volume puts the spotlight on the socioeconomic financial and political challenges provoked by territorial fiscal inequalities in federal systems and the diversity of mechanisms created by the different federations in confronting or mitigating its adverse consequences The main goal of the book is to study the state of the question of territorial inequalities and fiscal equalisation systems in federal and decentralised countries after the 2008 financial crisis and the COVID 19 health crisis The volume combines theoretical approaches with case studies and involves scholars from various disciplines in order to provide a comprehensive view of the issue

The Future of Federalism Richard Eccleston, Richard Krever, 2017-01-27 The crisis and its aftermath had a dramatic short term effect on federal relations and as the twelve case studies in this volume show set in place a new set of socio political factors that are shaping the longer run process of institutional evolution and adaptation in federal systems This illuminating book illustrates how an understanding of these complex dynamics is crucial to the development of policies needed for effective and sustainable federal governance in the twenty first century

Natural Resources and Conflict Dynamics in Federal Countries Eyene Okpanachi, 2025-07-02 This book examines the dynamics of oil and gas conflicts within the context of federalism in Canada an older federation with broadly a decentralized institutional design governing oil and gas and Nigeria a newer federation with a largely centralized design It traces resource ownership control or regulation and revenue sharing conflict processes over time and provides a focused comparison of conflict over the role of oil in intergovernmental fiscal transfers in both countries In so doing the book provides a much needed corrective to conventional static notions of oil conflict as either violent or nonviolent outcomes by carefully analyzing the evolution and ebbs and flows of conflicts hidden within conflict patterns that appear to be self reinforcing and entrenched The book demonstrates that decentralization dynamics especially the continuities and shifts in federal institutional structural and ideational rules about oil itself are central to the concept of conflict dynamics It highlights the endogenous processes of federal institutional development and lends credence to the historical institutionalists emphasis on the entanglement of institutions in their own transformation Yet the book also reveals that conflict dynamics did not emerge solely from the initial compromise between federal and provincial state actors regarding the allocation of competence over oil The renegotiation and reinterpretation of these rules over time which entails a redistribution of power resources in response to historical temporalities and shocks political agency and changing socioeconomic realities also generated unique patterns of conflict and conflict resolution within the federal institutional arenas

EU Fiscal Capacity Federico Fabbrini, 2023-01-08 EU Fiscal Capacity Legal Integration After Covid 19 and the War in Ukraine argues that the NGEU constitutes a profound overhaul in the EU architecture of economic governance Moving away from the fiscal surveillance shown in response to the euro crisis the EU has adopted a strategy of fiscal federalism more akin to the United States

Economic Governance in Europe Federico Fabbrini, 2016-01-28 The Euro Crisis and the legal and institutional responses to it have had important constitutional

implications on the architecture of the European Union EU Going beyond the existing literature Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU disaggregating three different dimensions 1 the vertical relations of power between the member states and the EU institutions 2 the relations of power between the political branches and the courts and 3 the horizontal relations of power between the EU member states themselves The first part of the book argues that in the aftermath of the Euro crisis power has been shifting along each of these axes in paradoxical ways In particular through a comparison of the United States Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs an unprecedented level of judicialization of economic questions and a growing imbalance between the member states in the governance of fiscal matters As the book makes clear however each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU such as the autonomy of the member states in taking decision about taxing and spending the preeminence of the political process in settling economic matters and the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union

Contemporary Governance Challenges in the Horn of Africa Charles Manga Fombad, Assefa Fiseha, Nico Steytler, 2022-09-06 This book argues that a leading cause of the political instability in the Horn of Africa is a crisis of governance caused by extreme centralization of power weak institutions and the failure to institutionalise the responsible use of authority In recent years many attempts have been made to resolve the ongoing conflicts in Somalia and South Sudan but problems remain and in 2019 the instability spread to Ethiopia This book critically examines how many of the governance problems in the region can be addressed through institutional design The central argument is that an inclusive system of governance through federalism devolution and inclusive political institutions as well as ensuring the institutionalization of power through strengthening the rule of law has the potential to make governments more accountable inclusive and be able to deliver critical services Such systems ensure relative stability and peace and reduce the risks of state fragmentation a major concern in the region Demonstrating that the threats of further fragmentation and conflict due to the crisis of governance are likely to continue unless serious steps are taken to deal with the situation the book will be an important read for researchers and policy makers with an interest in peacemaking politics constitutional law and federalism in the region

VAT and Financial Services Robert F. van Brederode, Richard Krever, 2017-03-06 This book explains the theoretical and policy issues associated with the taxation of financial services and includes a jurisdictional overview that illustrates alternative policy choices and the legal consequences of those choices The book addresses the question how can financial services in an increasingly globalized market best be taxed through VAT while

avoiding economic distortions It supports the discussion of the key practical problems that have arisen from the particular complexity of the application of VAT to financial services and allows for the evaluation of best practice by comparing the major current reform models now being implemented Democracy, Federalism, the European Revolution, and Global Governance Andrea Bosco, 2020-06-10 The European Union is facing today the greatest crisis since its creation Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration However few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction democracy and federalism and the first who tried to realise in June 1940 a European federation on the basis of an Anglo French union This volume traces the fundamental stages of the European unification process placing it in relation to the wider process of world economic and political integration In particular it analyses the historical significance of the European Revolution which is identified in the overcoming of the nation state namely the modern political formula which institutionalised the political division of mankind and the birth of the first truly international state The universal historical significance of the European Revolution lies in its exportability as for the other great European revolutions and therefore its potential as progressively extensible to all the states of the planet Europe was indeed the first region of the world where the barriers between national states fell and a post national political identity emerged complementary to national political identities It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized constituting a guiding principle for global governance *The Political Economy of Federalism in Nigeria* Dele Babalola, 2018-12-29 This book uses the political economy approach to examine the relative failure of federalism in Nigeria It shows the nexus between the political and the economic aspects of the country's federalism The central feature of Nigeria's political economy is the relationship between oil resources and the state The author argues that the inability of the federal government to distribute the oil wealth fairly amongst the component units contributes to the dysfunctional character of the federal system This deficiency is rooted in the country's unbalanced political economy which promotes over dependency on oil and consequently an over centralised federal system The book concludes that despite its complexities federalism has become the basis for the country's stability Therefore ethno regional demands for true federalism will continue until the political elite reform the ailing federal system Territory and Power in Constitutional Transitions George Anderson, Sujit Choudhry, 2019-03-07 This collection of essays surveys the full range of challenges that territorial conflicts pose for constitution making processes and constitutional design It provides seventeen in depth case studies of countries going through periods of intense constitutional engagement in a variety of contexts small distinct territories bi communal countries highly diverse countries with many politically salient regions and countries where territorial politics is important but secondary to other bases for political mobilization Specific examples are drawn from Iraq Kenya Cyprus Nigeria South Africa Sri Lanka the UK Scotland Ukraine Bolivia India Spain Yemen Nepal

Ethiopia Indonesia Aceh the Philippines Mindanao and Bosnia Herzegovina While the volume draws significant normative conclusions it is based on a realist view of the complexity of territorial and other political cleavages the country's political geometry and the power configurations that lead into periods of constitutional engagement Thematic chapters on constitution making processes and constitutional design draw original conclusions from the comparative analysis of the case studies and relate these to the existing literature both in political science and comparative constitutional law This volume is essential reading for scholars of federalism consociational power sharing arrangements asymmetrical devolution and devolution more generally The combination of in depth case studies and broad thematic analysis allows for analytical and normative conclusions that will be of major relevance to practitioners and advisors engaged in constitutional design **The Indian Journal of Public Administration** ,2011 **Dialogues on Intergovernmental Relations in Federal Systems**

Karl Nerenberg,2011-06-16 In 2005 a Harvard conference honoured Paul Weiler originally from Thunder Bay Ontario who drafted the Notwithstanding Clause of the Canadian Charter of Rights and Freedoms and created the Canada Program at Harvard University Weiler's Notwithstanding Clause saved the floundering constitutional talks that eventually rebuilt Canada upon the Charter of Rights and Freedoms In Part One of this book Weiler lucidly describes his very Canadian legal philosophy spelling out his original intent in drafting the clause Joining Harvard in 1979 he set up a Canada Program that has provided the image of Canada held by many future leaders He reenergized the languishing Mackenzie King Endowment for Canadian Studies and soon Mackenzie King visiting professors were teaching everything from Canadian economics to Canadian aboriginal history After Weiler's address at the 2005 conference past Mackenzie King professors spoke on Canada the second part of this book contains their essays Many discuss constitutional law or politics but discussions range from economic nationalism to water rights Readers interested in what Harvard students learn about Canada will find these essays intriguing Weiler's Canada Program is expansively multidisciplinary and this book is a respectful tribute to both Weiler and to Canada Contributors include Thomas S Axworthy Queen's University Albert Breton Alan Cairns John C Courtney Angela Frascini John F Helliwell Haifang Huang Richard Johnston Elena Kagan Dean of Harvard Law School Randall Morck University of Alberta Joy Parr Anthony Scott Laurier Turgeon and Paul Weiler **Regional Dynamics in Central and Eastern Europe**

Francesco Palermo,Sara Parolari,2013-02-15 Based on a multidisciplinary analysis the book presents a contemporary view of the main challenges facing regional development and regional policy in Central and Eastern Europe particularly considering to what extent domestic and non domestic legacies have affected the regionalization process in this area The volume mainly focuses on the institutional arrangements at regional level analyzing the motives procedures and outcomes of either political or administrative reforms introduced in the latest years The focus are the former communist countries both members of the EU and not case studies selected Romania Hungary Poland and Serbia with a specific chapter concentrating on a case study from the West England whose process of regionalization provides a useful point of reference
