Subcommittee on Communications, Technology, and the Internet, 2015 *The Paradoxes of Network Neutralities* Russell A. Newman, 2024-04-09 An argument that the movement for network neutrality was of a piece with its neoliberal environment solidifying the continued existence of a commercially driven internet Media reform activists rejoiced in 2015 when the FCC codified network neutrality approving a set of Open Internet rules that prohibited providers from favoring some content and applications over others only to have their hopes dashed two years later when the agency reversed itself In this book Russell Newman offers a unique perspective on these events arguing that the movement for network neutrality was of a piece with its neoliberal environment rather than counter to it perversely it served to solidify the continued existence of a commercially dominant internet and even emergent modes of surveillance and platform capitalism Going beyond the usual policy narrative of open versus closed networks or public interest versus corporate power Newman uses network neutrality as a lens through which to examine the ways that neoliberalism renews and reconstitutes itself the limits of particular forms of activism and the shaping of future regulatory processes and policies Newman explores the debate s roots in the 1990s movement for open access the transition to network neutrality battles in the 2000s and the terms in which these battles were fought By 2017 the debate had become unmoored from its own origins and an emerging struggle against neoliberal sincerity points to a need to rethink activism surrounding media policy reform itself **Fundamentals of Internet of Things** F. Kim,Jan Feijen,Teruo Okano,2012-12-06 First of all I would like to share the great pleasure of the successful five day symposium with every participant in the 5th Iketani Conference which was held in Kagoshima from April1S Tuesday to 22 Saturday 1995 Outstanding speakers enthusiastically presented their up to the minute results Relatively little time was allotted for each presentation to ensure asd much time as possible for intensive discussions on the particular topics that had just been p esented I was delighted to see that the lectures were of high quality and the discu ssionswere lively exciting and productive in a congenial atmosphere We also had 92 papers in the poster session in which young and relatively young scientists made every effort to present the novel results of their research in advanced biomaterials and drug delivery systems DDS I believe some of the research is most promising and will become noteworthy in the twenty first century It was a privilege for me to deliver a lecture at the special session of the symposium In

my introductory remarks I pointed out five key terms in multifaceted biomaterials research materials design concept or methodology devices properties demanded and fundamentals I am confident that innovative progress in device manufacturing for end use e g artificial organs vascular grafts and DDS can be brought about only through properly designed advanced materials that exhibit the desired functionality at the interface with any living body
