A User Acceptance of Web Personalization Systems Dr. Fendi Ameen,2014-10-09 Research on web personalization techniques for collecting and analysing web data in order to deliver personalized information to users is in an advanced state Many metrics from the computational intelligence field have been developed to evaluate the algorithmic performance of Web Personalization Systems WPSs However measuring the success of a WPS in terms of user acceptance is difficult until the WPS is deployed in practice In summary many techniques exist for delivering personalized information to a user but a comprehensive measure of the success in WPSs in terms of human interaction and behaviour does not exist This study aims to develop a framework for measuring user acceptance of WPSs from a user perspective The proposed framework is based on the unified theory of acceptance and use of technology UTAUT The antecedents of user acceptance are described by indicators based on four key constructs i e performance expectancy PE effort expectancy EE social influence SI and facilitating conditions FC All these constructs are underpinned by Information Systems IS theories that determine the intention to use BI and the actual use USE of a technology A user acceptance model was proposed and validated using structural equation modelling SEM via the partial least squares path modelling PLS PM Four user characteristics i e gender age skill and experience have been chosen for testing the moderating effects of the four constructs The relationship between the four constructs in regard to BI and USE has been validated through moderating effects in order to present an overall view of the extent of user acceptance of a WPS Results from response data analysis show that the acceptance of a WPS is determined through PE EE SI and FC The gender of a user was found to moderate the relationship between performance expectancy of a WPS and their behavioural intention in using a WPS The effect of behavioural intention on the use of WPS is higher for a group of females than for males Furthermore the proposed model has been tested and validated for its explanation power of the model and effect size The current study concluded that predictive relevance of intention to use a

WPS is more effective than the actual WPS usage which indicated that intention to use has more prediction power for describing a user acceptance of a WPS The implications of these measures from the computational intelligent point of view are useful when a WPS is implemented For example the designer of a WPS should consider personalized design features that enable the delivery of relevant information sharing to other users and accessibility across many platforms Such features create a better web experience and a complete security policy These measures can be utilized to obtain a higher attention rate and continued use by a user the features that define user acceptance of a WPS The Official National Basketball Committee Basketball Guide National Basketball Committee of the United States and Canada,1947 **Mac Schweitzer** Ann Lane Hedlund,2025-09-23 In Tucson during the 1950s nearly everyone knew or wanted to know the southwestern artist Mac Schweitzer Born Mary Alice Cox in Cleveland Ohio in 1921 she grew up a tomboy who adored horses cowboys and art After training at the Cleveland School of Art and marrying she adopted her maiden initials M A C as her artistic name and settled in Tucson in 1946 With a circle of influential friends that included anthropologists designer craftsmen and Native American artists she joined Tucson s Early Moderns receiving exhibits commissions and awards for her artwork When she died in 1962 Mac s artistic legacy faded from public view but her prize winning works attest to a thriving career Author Ann Lane Hedlund draws from the artist s letters photo albums and published reviews to tell the story of Mac s creative and adventuresome life Her watercolors oil paintings prints and sculptures a diverse body of work never before seen in public range from naturalistic studies of Sonoran Desert animals to impressionistic landscapes to moody abstractions A sharp observer of Indigenous life she sketched and painted scenes of Navajo Din Hopi O odham and Yaqui people and events These unique portrayals of the Southwest illustrate this saga of a maverick artist rediscovered *Colorado State Mining Directory, 1898 ... ,1898* *Greed Chose Murder* Walter McKeever,2007-09 When psychology professor Redmond McClain joins the Ravenslake University faculty in Pleasanton Ohio he and artist wife Jennifer enjoy the historic town thrilling athletic and cultural events and interesting new friends They learn that Anita Parmalee onetime Pleasanton resident recently fell to her death at their favorite place the Grand Canyon On Fall Break in Flagstaff local professor Margo Layne tells them of Anita s affluent background But Pleasantonian Tierney Thornhill tells a quite different story of Anita They speculate on how the promiscuous Anita acquired money in Arizona At Grounds for Thinking a coffee shop and used bookstore Jen prices book acquisitions for the shop She discovers a cryptic note in an untraceable book What could it mean murder Speculations insights and discoveries pull crimes separated by years and distance together in the lively minds of Mac and Jen Then a horrific here and now killing shocks peaceful Pleasanton Mac and Jen can t know their insatiable curiosity puts them in deadly peril but that knowledge is coming *InfoWorld* ,1987-08-24 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Bibliographic Guide to Dance New York Public Library.
