In recent decades, the rise of the so-called global obesity epidemic has led to fatness and fat bodies being debated incessantly in popular, professional and academic arenas. Fatness and fat bodies are shamed and demonised, and the public monitoring, surveillance and outright policing by the media, health professionals and the general public are pervasive and socially accepted. In *Neoliberal Bodies and the Gendered Fat Body*, Hannele Harjunen claims that neoliberal economic policy and rationale are enmeshed with conceptions of body, gender and health in a profound way in contemporary western culture. She explores the relationships between fatness, health and neoliberal discourse and the role of economic policy in the construction of the gendered fat body and examines how neoliberal discourses join patriarchal and biomedical constructions of the fat female body. In neoliberal culture, the fat body is not just the unhealthy body one finds in medical discourse but also the body that is costly, unproductive and inefficient, failing in the crucial task of self-management. With an emphasis on how neoliberal governmentality in its many forms affects the fat body and contributes to its vilification, this book is essential reading for scholars of feminist thought, sociology, cultural studies and social theory with interests in the body, gender and the effects of neoliberal discourse on social attitudes. *Achieving food system resilience & equity in the era of global environmental change* Albie F. Miles, Valarie Blue Bird Jernigan, Philip Dobie, Anja Gassner, Casey Hoy, Noa Kekuewa Lincoln, Kathleen Merrigan, Jennifer Sowerwine, Samina Raja, 2023-02-27. with problems of power inequality distribution and implicated in old and new geopolitical conflicts As such food and food security are central to conditions of poverty and hunger development and modernisation transitional justice and rule of law reform around the world As a problem of critique and scholarly inquiry food prompts an inter disciplinary assessment of the nature of food security in the modern world The contributors to this book take us deep into the complexity of food and illustrate the challenges of adequately understanding and approaching questions of food security and food sovereignty in a globally interconnected world Transnational Food Security will be of great interest to scholars of international relations political economy and transnational law The chapters were originally published as a special issue of Transnational Legal Theory Journal
