Hazardous Wastes (1991) William S. Rickman,2017-11-22 Hazardous waste incineration technologies have been developed
to meet the needs of a rapidly growing market that has been created by the proliferation of hazardous waste in modern
society These hazardous wastes are continuously produced as by products of many industries Vast stockpiles of hazardous or
toxic wastes are currently residing in insecure landfills thus imperiling our drinking water supplies This handbook is written
with the user in mind An in depth review of regulatory and technical requirements is presented with later sections regarding
permitting and operation of incineration facilities A comprehensive description of established and emerging incinerator
technologies is included along with a number of alternatives One of the key sections involves a detailed procedure for
choosing an incinerator for a specific job including engineering calculations and going through the bid process Rationale for
whether to buy or lease incineration equipment is included as well as details on trial burns permitting strategies and startup
and operation of incinerators A number of typical case histories of incinerators are presented for such diverse applications as
cleaning up individual sites with transportable units stationary facilities for in house wastes and incinerator ships Appendices
provide a convenient reference to physical properties combustion parameters detailed equipment performance nomographs
and several sample permits including RCRA TSCA and local permit applications In summary this handbook provides a single
reference point for the potential user of an incinerator as well as a valuable source of design data for incinerator vendors
