United States The purpose is to increase gender equality at work for all employees With a focus on leave policy inequalities this book argues that men experience a phenomenon called the glass handcuffs which prevents them from leaving work to participate fully in their families homes and other life events highlighting the cultural institutional organizational and occupational conditions which make gender equality in work life policy usage difficult This social justice book ultimately draws conclusions about how to minimize inequalities at work Gender Equality and Work Life Balance is unique as it laces together some theoretical concepts which have little previous association including entrepreneurialism leave policy occupational identity and the economic necessities of families This book will therefore be of particular interest to researchers and academics alike in the disciplines of Gender studies Human Resource Management Employment Relations Sociology and Cultural Studies
