Erlaine, 2024-03-12 Our universe is characterized by constant motion. From electrons to galaxies, all things are on the move. This resonates within the human condition: we are born to move. From the earliest hunters, sailors, and horse riders to the modern world of trains, bicycles, and cars, movement is everywhere in human life. Our history as nomads compares starkly to our increasingly sedentary life today. This fundamental disruption of the human as a moving being led to the invention of the wheel, new religious cultures, and even the rational mind. This book considers the full depth of the link between humanity and motion, examining how it manifests in us and how we embody it. Broad and multidisciplinary, it blends history, geography, psychology, philosophy, architecture, anthropology, and spirituality. **Handbook of East and Southeast Asian**

Archaeologically derived data are emphasized, with text-based documentary information provided to complement interpretations of material culture. The Handbook is not restricted to art, historical, or purely descriptive perspectives; its geographical coverage includes the modern nation states of China, Mongolia, Far Eastern Russia, North and South Korea, Japan, Taiwan, Vietnam, Cambodia, Laos, Thailand, Burma, Malaysia, Indonesia, the Philippines, and East Timor. **City and Country** Alexander R. Thomas, Gregory M. Fulkerson, 2021-06-17 City and Country The Historical Evolution of Urban Rural Systems begins with a simple assumption every human requires on average two thousand calories per day to stay alive Tracing the ramifications of this insight leads to the caloric well the caloric demand at one point in the environment As population increases the depth of the caloric well reflects this increased demand and requires a population to

go further afield for resources a condition called urban dependency City and Country traces the structural ramifications of these dynamics as the population increased from the Paleolithic to today We can understand urban dependency as the product of the caloric demands a population puts on a given environment and when those demands outstrip the carry capacity of the environment a caloric well develops that forces a community to look beyond its immediate area for resources As the well deepens the horizon from which resources are gathered is pushed further afield often resulting in conflict with neighboring groups Prior to settled villages increases in population resulted in cultural technological innovations that allowed for greater use of existing resources the broad spectrum revolution circa 20 thousand years ago the birth of agricultural villages 11 thousand years ago and hierarchically organized systems of multiple settlements working together to produce enough food during the Ubaid period in Mesopotamia seven thousand years ago the first urban rural systems As cities developed increasing population resulted in an ever deepening morass of urban dependency that required expansion of urban rural systems These urban rural dynamics today serve as an underlying logic upon which modern capitalism is built The culmination of two decades of research into the nature of urban rural dynamics City and Country argues that at the heart of the logic of capitalism is an even deeper logic urbanization is based on urban dependency *Who We Are and How We Got Here* David Reich, 2018-03-27 A groundbreaking book about how ancient DNA has profoundly changed our understanding of human history Geneticists like David Reich have made astounding advances in the field of genomics which is proving to be as important as archeology linguistics and written records as a means to understand our ancestry In *Who We Are and How We Got Here* Reich allows readers to discover how the human genome provides not only all the information a human embryo needs to develop but also the hidden story of our species Reich delves into how the genomic revolution is transforming our understanding of modern humans and how DNA studies reveal deep inequalities among different populations between the sexes and among individuals Provocatively Reich's book suggests that there might very well be biological differences among human populations but that these differences are unlikely to conform to common stereotypes Drawing upon revolutionary findings and unparalleled scientific studies *Who We Are and How We Got Here* is a captivating glimpse into humankind where we came from and what that says about our lives today

**Theory in the Pacific, the Pacific in Theory** Tim Thomas, 2020-07-27 Theory in the Pacific the Pacific in Theory explores the role of theory in Pacific archaeology and its interplay with archaeological theory worldwide The contributors assess how the practice of archaeology in Pacific contexts has led to particular types of theoretical enquiry and interest and more broadly how the Pacific is conceptualised in the archaeological imagination Long seen as a laboratory environment for the testing and refinement of social theory the Pacific islands occupy a central place in global theoretical discourse This volume highlights this role through an exploration of how Pacific models and exemplars have shaped and continue to shape approaches to the archaeological past The authors evaluate key theoretical perspectives and explore current and future directions in Pacific archaeology In doing so attention is paid to the influence of Pacific people and environments in motivating and shaping theory building Theory in the Pacific the Pacific in Theory makes a significant contribution to our understanding of how theory develops attuned to the affordances and needs of specific contexts and how those contexts promote reformulation and development of theory elsewhere It will be fascinating to scholars and archaeologists interested in the Pacific region as well as students of wider archaeological theory

*Collision of Worlds* David M. Carballo, 2020 Mexico of five centuries ago was witness to one of the most momentous encounters between human societies when a group of Spaniards led by Hernando Cortés joined forces with tens of thousands of Mesoamerican allies to topple the mighty Aztec empire It served as a template for the forging of much of Latin America and began the globalized world we inhabit today This violent encounter and the new colonial order it created a New Spain was millennia in the making with independent cultural developments on both sides of the Atlantic and their fateful entanglement during the pivotal Aztec Spanish war of 1519 1521 Collision of Worlds provides a deep history of this encounter with an archaeological lens one that considers depth in the richly layered cultures of Mexico and Spain like the depths that archaeologists reveal through excavation to chart early layers of human history It offers a unique perspective on the encounter through its temporal depth and focus on the physical world of places and things their similarities and differences in trans Atlantic perspective and their interweaving in an encounter characterized by conquest and colonialism but also active agency and resilience on the part of Native peoples
