## **First The Transition Then The Crash Eastern Europe In The 2000s:**

First the Transition, then the Crash Gareth Dale, 2011-09-12 The 1989 91 upheavals in Eastern Europe sparked a turbulent process of social and economic transition Two decades on with the global economic crisis of 2008 10 a new phase has begun This book explores the scale and trajectory of the crisis through case studies of the Czech Republic Hungary Latvia Poland Russia Ukraine and the former Yugoslavia The contributors focus upon the relationships between geopolitics the world economy and class restructuring The book covers the changing relationship between business and states foreign capital flows financialisation and asset price bubbles austerity and privatisation and societal responses in the form of reactionary populism and progressive social movements Challenging neoliberal interpretations that envisage the transition as a process of unfolding liberty the dialectic charted in these pages reveals uneven development attenuated freedoms and social polarisation

Hungary's Crisis of Democracy Peter Wilkin, 2016-08-26 This book examines the crisis of democracy that has arisen in Hungary since the election of the Fidesz government in 2010 After moving swiftly to transform the Hungarian constitution Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy society and the political system In so doing Fidesz actions resemble those undertaken by many authoritarian states that have emerged since the end of the Second World War all aiming to build up a national capitalism and protect their economies whilst undertaking nation building To make sense of this the author draws upon two traditions of thought world systems analysis which situates Hungary in the context of its incorporation in the modern capitalist world system after the fall of communism and anarchist social thought which provides a unique way of seeing the actions of states and political elites In so doing the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990 The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism and when added to the failure of the left and liberals in the region it has paved the way for far right and neo fascist political movements to emerge claiming the mantle of defenders of society from the market This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO

**The Political Economy of Eastern Europe 30 years into the 'Transition'** Agnes Gagyí, Ondřej Slačálek, 2021-10-11

*Disability and Postsocialism* Teodor Mladenov, 2017-08-07 In the decades following the collapse of state socialism at the end of 1980s disabled people in Central and Eastern Europe endured economic marginalisation cultural devaluation and

political disempowerment Some of the mechanisms producing these injustices were inherited from state socialism while others emerged with postsocialist neoliberalisation State socialism promised social security guaranteed by the public and postsocialist neoliberalisation promised independent living underpinned by the market This book argues that both promises failed as far as disabled people were concerned drawing on a wide range of scholarly reports and analyses policy documents legislation and historical accounts as well as on disability studies and social justice theory Besides differences the book also illuminates continuities between state socialism and postsocialist capitalism providing on this basis a more general and historically grounded critique of contemporary neoliberalisation and its impact on individual and collective life The book will appeal to anyone interested in disability studies and postsocialism as well as social policy social movements and critical theory It will also be of interest to professionals involved in disability related service provision as well as to disability activists and policy makers

The Longue Durée of the Far-Right Richard Saull,Alexander Anievas,Neil Davidson,Adam Fabry,2014-08-27 This volume brings together a number of international scholars to offer an original analysis of far right movements and politics challenging the existing literature through a very different methodological and theoretical perspective The approach offered here is that of longue dur e analysis whereby the far right is understood as an evolving subject of capitalist modernity The authors argue that an assessment of the contemporary characteristics of the far right needs to consider the ways in which it is a product of deeper and longer term structures of socio economic and political development than for example the inter war crises of capitalism The book aims to provide a critical and theoretically informed assessment of the history of the far right that centres on the international as key to any understanding its evolution and which distinguishes between the fascist and non fascist variants as an essential precondition for comprehending the far right presence in contemporary politics

**The Political Economy of Middle Class Politics and the Global Crisis in Eastern Europe** Agnes Gagy,2021-08-09 Contrary to dominant narratives which portray East European politics as a pendulum swing between democracy and authoritarianism conventionally defined in terms of an ahistorical cultural geography of East vs West this book analyzes post socialist transformation as part of the long downturn of the post WWII global capitalist cycle Based on an empirical comparison of two countries with significantly different political regimes throughout the period Hungary and Romania this study shows how different constellations of successive late socialist and post socialist regimes have managed internal and external class relations throughout the same global crisis process from very similar positions of semi peripheral post socialist systemic integration Within this context the book follows the role of social movements since the 1970s paying attention both to the level of differences between local integration regimes and to the level of structural similarities of global integration The analysis maintains a special focus on movements class composition and inter class relationships and the specific position of middle class politics in movements

*The Global Rise of Authoritarianism in the 21st Century* Berch Berberoglu,2020-09-22 Neoliberal globalization is in deep crisis This crisis is

manifested on a global scale and embodies a number of fundamental contradictions a central one of which is the global rise of authoritarianism and fascism This emergent form of authoritarianism is a right wing reaction to the problems generated by globalization supported and funded by some of the largest and most powerful corporations in their assault against social movements on the left to prevent the emergence of socialism against global capitalism As the crisis of neoliberal global capitalism unfolds and as we move to the brink of another economic crisis and the threat of war global capitalism is once again resorting to authoritarianism and fascism to maintain its power This book addresses this vital question in comparative historical perspective and provides a series of case studies around the world that serve as a warning against the impending rise of fascism in the 21st century      *Towards a Political Economy of Ukraine: Selected Essays 1990-2015* Marko

Bojczun,2020-09-29 The essays in this book explore the major developments both domestic and international that shaped the first quarter century of Ukraine's independence the simultaneous construction of a nation state and the privatization of its economy a formal democratization of the political process alongside the capture of state institutions by big business oligarchs their efforts to gain social acceptance at home while maneuvering between competing Russian EU and American projects to hegemonize the region the impact of the financial crises of 1997 and 2008 on Ukrainian society and the national economy's place in the world market the growing inequality of society the mass revolts in 2004 and 2014 against corruption and injustice and the beginning of Russian military intervention in Ukraine      *Mobile Hollywood* Kevin Sanson,2024-02-06 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more Contemporary film and television production is extraordinarily mobile Filming large scale studio productions in Atlanta Budapest London Prague or Australia's Gold Coast makes Hollywood jobs available to people and places far removed from Southern California but it also requires individuals to uproot their lives as they travel around the world in pursuit of work Drawing on interviews with a global contingent of film and television workers Kevin Sanson weaves an analysis of the sheer scale and complexity of mobile production into a compelling account of the impact that mobility has had on job functions working conditions and personal lives Mobile Hollywood captures how an expanded geography of production not only intensifies the often invisible pressures that production workers now face but also stretches the parameters of screen media labor far beyond craftwork and creativity      **Crises in the Post-Soviet Space** Felix

Jaitner,Tina Olteanu,Tobias Spöri,2018-06-13 The breakup of the Soviet Union led to the creation of new states and territorial conflicts of different levels of intensity Scrutinising the post Soviet period this volume offers explanations for both the frequency and the intensity of crises in the region This book argues that the societies which emerged in the post Soviet space share characteristic features and that the instability and conflict prone nature of the Soviet Union's successor states can be explained by analysing the post independence history of the region and linking it to the emergence of overlapping economic political and violent crises called Intersecting Crises Phenomena Transformation itself is shown to be a decisive process and

while acknowledging specific national and regional characteristics and differences the authors demonstrate its shared impact This comparison across countries and over time presents patterns of crisis and crisis management common to all the successor states It disentangles the process highlighting the multifaceted features of post Soviet crises and draws upon the concept of crisis to determine the tipping points of post Soviet development Especially useful for scholars and students dealing with the Soviet successor states this book should also prove interesting to those researching in the fields of communist and post communist Studies Eurasian politics international relations and peace and conflict studies The Legacies of Totalitarianism Aviezer Tucker, 2015-10-15 This book provides the first political theory of post Communist Europe discussing liberty rights transitional justice property privatization and rule of law *The Revival of the Left in the Balkans* Filip Balunović, 2024-12-02 This book explores how the critical discursive breakthrough of social movements in Serbia Bosnia and Herzegovina and Croatia disrupted the post socialist transitional status quo While critical ideas have long fueled social and political actions the specifics of their relationship with activism have received limited scholarly attention This book discusses the emergence of new left actors through the lens of a maturation of consciousness rather than the opening of structural or other windows of opportunity suggesting the potential for such actors to emerge stemmed from the exposure of a segment of the populace to critical ideas Questions surrounding the relevance of different types of knowledge in contemporary movements their origins dissemination and the organizational factors shaping their adoption within social movement collectives are central to this work as the author digs into the intricate relationship between critical knowledge and activism explores the cognitive underpinnings of critical social and political engagement and examines the influence of both non theoretical and theoretical knowledge This book will be of great value to postgraduate students and scholars in social sciences particularly those studying social movements and Eastern and Southeastern European politics *Global Governance and Transnationalizing Capitalist Hegemony* Ian Taylor, 2016-11-25 This book is a critique of claims regarding how emerging economies are supposedly rewriting the rules of global governance and ushering in alternative models to neoliberal orthodoxy It argues that such assumptions are abstractions that ignore both the transnationalizing nature of the global political economy and the actual policy goals of the ruling classes within most emerging economies Considering the larger issues behind the emerging economies or powers debate the book deploys an adapted global capitalism perspective with insights from Gramsci Poulantzas and Cox to argue that the transnational nature of the global political economy and the actual policy goals of the dominant elites within most emerging economies merge to undermine any transformative element Far from challenging the global order these ostensible new rivals in fact seek to integrate their economies more and more within the existing liberal global economy Inter state dynamics and even inter elite tensions exist and it is clear that the nation state has not simply become a transmission belt for global capital but equally we must move beyond the surface phenomena that are most visible in global tensions to get at the underlying essence of social and class forces in the global

political economy Looking at the largest emerging powers such as Brazil Russia India and China Taylor explains why the emerging powers elites although essentially subscribing to neoliberalism in all its variegated forms may confront the core in a myriad of ways but that these are not challenges to the ongoing world order and in fact the so called emerging powers serve a legitimizing function for the extant global system The book will be of great use to graduates and scholars of International Relations Global International Political Economy and International Development *Central and Eastern European Economies* Marcus Goncalves,Erika Cornelius Smith,2016-07-25 Nearly seven decades ago six countries in Western Europe Belgium France West Germany Italy Luxembourg and the Netherlands decided to take economic cooperation to the next level The vision of the EU founding states epitomized by the Schuman Declaration in 1950 was to tie their economies so closely together that war would become impossible Robert Schuman author of the plan believed Europe could not be made all at once or according to a single plan It would have to be built through concrete achievements which first create a de facto solidarity The countries within the European Community benefited enormously from free trade and common economic policies in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE SEE and CIS *Resistance in the Age of Austerity* Owen Worth,2013-04-11 In November 1999 the first protests associated with the anti globalisation movement took place in Seattle and came to be seen as the starting point for globalised resistance to neoliberal capitalism Despite initial optimism the following years have seen little progress in formulating a coherent alternative to neoliberalism a failure that has become particularly poignant in the aftermath of the recent credit crisis Now the neoliberal mandate that appeared to be in crisis in just 2008 has reinvented itself through the guise of a new era of austerity In this timely book Worth assesses the growing diversity of resistance to neoliberalism progressive nationalist and religious and argues that troublingly the more reactionary alternatives to globalisation currently provide just as coherent a base for building opposition as those associated with the traditional left wing anti globalisation movements From the shortcomings of the Occupy movement to the rise of Radical Islam the re emergence of the far right in Western Europe to the startling impact of the Tea Party in the US Worth shows that while a progressive alternative is possible it cannot be taken for granted *Critical Theory and Disability* Teodor Mladenov,2016-06-30 Critical Theory and Disability explores social and ontological issues encountered by present day disabled people applying ideas from disability studies and phenomenology It focuses on disabling contexts in order to highlight and criticize the ontological assumptions of contemporary society particularly those related to the meaning of human being In empirical terms the book explores critically social practices that undermine disabled people s well being drawing on cases from contemporary Bulgaria It includes in depth examination of key mechanisms such as disability assessment personal assistance direct payments and disability based discrimination On

this basis wider sociological and ontological claims are made concerning the body identity otherness and exclusion

**Eastern European Economies** Marcus Goncalves,Erika Cornelius Smith,2016-06-27 Nearly seven decades ago six countries in Western Europe Belgium France West Germany Italy Luxembourg and the Netherlands decided to take economic cooperation to the next level The vision of the EU founding states epitomized by the Schuman Declaration in 1950 was to tie their economies so closely together that war would become impossible Robert Schuman author of the plan believed Europe could not be made all at once or according to a single plan It would have to be built through concrete achievements which first create a de facto solidarity The countries within the European Community benefited enormously from free trade and common economic policies in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE SEE and CIS

American Grand Strategy and Corporate Elite Networks Bastiaan Van Apeldoorn,Naná de Graaff,2015-10-23 This book presents a novel analysis of how US grand strategy has evolved from the end of the Cold War to the present offering an integrated analysis of both continuity and change The post Cold War American grand strategy has continued to be oriented to securing an open door to US capital around the globe This book will show that the three different administrations that have been in office in the post Cold War era have pursued this goal with varying means from Clinton s promotion of neoliberal globalization to Bush s war on terror and Obama s search to maintain US primacy in the face of a declining economy and a rising Asia In seeking to make sense of both these strong continuities and these significant variations the book takes as its point of departure the social sources of grand strategy making with the aim to relate state public power to social private power While developing its own theoretical framework to make sense of the evolution of US grand strategy it offers a rich and rigorous empirical analysis based on extensive primary data that have been collected over the past years It draws on a unique data set that consists of extensive biographical data of 30 cabinet members and other senior foreign policy officials of each of the past three administrations of Clinton G W Bush and Obama This book is of great use to specialists in International Relations within International Political Economy International Security and Foreign Policy Analysis as well as students of US Politics

*Theoretical Engagements in Geopolitical Economy* Radhika Desai,2015-09-22 This two part volume paves the way advancing Geopolitical Economy as a new approach to the study of international relations and international political economy They expose the theoretical limitations of the latter in Part I and the analytical limitations in Part II

*Capital, the State, and War* Alexander Anievas,2014-04-11 The history of the modern social sciences can be seen as a series of attempts to confront the challenges of social disorder and revolution wrought by the international expansion of capitalist social relations Alexander Anievas focuses on one particularly significant aspect of this story the intersocietal or geosocial origins of the two world wars and more broadly the confluence of factors behind the Thirty Years

Crisis between 1914 and 1945 Anievas presents the Thirty Years Crisis as a result of the development of global capitalism with all its destabilizing social and geopolitical consequences particularly the intertwined and co constitutive nature of imperial rivalries social revolutions and anti colonial struggles Building on the theory of uneven and combined development he unites geopolitical and sociological explanations into a single framework thereby circumventing the analytical stalemate between primacy of domestic politics and primacy of foreign policy approaches
