An abstract architectural sculpture composed of numerous rectangular blocks of varying sizes and colors, including shades of brown, tan, and grey. The blocks are stacked and arranged in a complex, non-linear fashion, creating a sense of depth and volume. The sculpture is set against a dark, textured background that appears to be a wall or a large panel. The lighting is dramatic, with strong highlights and deep shadows, emphasizing the geometric forms and the overall composition.

The Architectural Imagination at the Digital Turn Nathalie Bredella, 2022-06-29

The Architectural Imagination at the Digital Turn asks what it means to speak of a digital turn in architecture It examines how architects at the time engaged with the digital and imagined future modes of practice and looks at the technological conceptual and economic phenomena behind this engagement It argues that the adoption of digital technology in architecture was far from linear but depended on complex factors from the operative logic of the technology itself to the context in which it was used and the people who interacted with it Creating a mosaic like account the book presents debates projects and publications that changed how architecture was visualized fabricated and experienced using digital technology Spanning the university new media art institutes ecologies architectural bodies fabrication and the city it re evaluates familiar narratives that emphasized formal explorations instead the book aims to complicate the myth of the digital by presenting a nuanced analysis of the material and social context behind each case study During the 1990s architects repurposed software and technological concepts from other disciplines and tested them in a design environment Some architects were fascinated by its effects others were more critical Through its discussion on case studies places and themes that fundamentally influenced discourse formation in the era this book offers scholars researchers and students fresh insights into how architecture can engage with the digital realm today

perhaps any other metropolis Located at the crossroads of struggles between democratic communist and fascist visions of the modern world twentieth century Prague witnessed revolutions and invasions national liberation and ethnic cleansing the Holocaust show trials and snuffed out dreams of socialism with a human face Yet between the wars when Prague was the capital of Europe s most easterly parliamentary democracy it was also a hotbed of artistic and architectural modernism and a center of surrealism second only to Paris Focusing on these years Sayer explores Prague s spectacular modern buildings monuments paintings books films operas exhibitions and much more A place where the utopian fantasies of the century repeatedly unraveled Prague was tailor made for surrealist Andr Breton s black humor and Sayer discusses the way the city produced unrivaled connoisseurs of grim comedy from Franz Kafka and Jaroslav Hasek to Milan Kundera and V clav Havel A masterful and unforgettable account of a city where an idling flaneur could just as easily be a secret policeman this book vividly shows why Prague can teach us so much about the twentieth century and what made us who we are **Minor**
