Gender And The Political Economy Of Development From Nationalism To Globalization:

Gender and the Political Economy of Development Shirin M. Rai, 2013-05-28 Rai subjects the projects of both national development and globalization to searching scrutiny through a gender lens Her emphasis on the intersection of gender and other forms of inequality is very timely An excellent text for a wide range of courses in politics sociology and development studies Diane Elson University of Essex Shirin Rai pushes us to rethink development She brings us to ear a feminist analysis that grows out of her nuanced understanding of both China s and India s gendered experience Readers will find fresh ideas and sharp caveats about how patriarchy is sustained and fought over globally Cynthia Enloe Clark University This important book ranges across contemporary debates in the study of gender and political economy It situates differing gender based theories in the context of wider political and historical processes such as colonialism post colonialism Cold War politics the New World Order globalization and democratization Shirin Rai focuses on the gendered nature of the political economy of development and the shifts that have occurred as economies and states have moved from a development process that is state focused to one that is clearly framed by globalization Differences between men and women and differences between women in contrasting social and geographical positions are explored in relation to their influence on political practice Rai considers how the structures of economic and political power frame men and women and examines the consequences of these gendered positionings She makes important connections between the political narratives of different levels of governance and examines the discourse of empowerment at these different levels The book concludes by reflecting on the way men and women are coping with the challenges of globalization and argues that women s movements need to re establish the link between the recognition of difference and the redistribution of economic and social resources if they are to maintain their radical edge This will be essential reading for undergraduates and graduates in politics development studies and gender studies

Rai, 2013-07-04 In The Gender Politics of Development Shirin Rai provides a comprehensive assessment of how gender politics has emerged and developed in post colonial states In chapters on key issues of nationalism and nation building the third wave of democratization and globalization and governance Rai argues that the gendered way in which nationalist statebuilding occurred created deep fissures and pressures for development She goes on to show how women have engaged with institutions of governance in developing countries looking in particular at political participation deliberative democracy representation leadership and state feminism Through this engagement Rai claims vital new political spaces have been created Though Rai focuses in depth on how these debates have played out in India the book s argument is highly relevant for politics across the developing world This is a unique and compelling synthesis of gender politics with ideas about development from an authoritative figure in the field

Gender, Development and Globalization Lourdes Beneria, Günseli Berik, Maria Floro, 2015-07-24 Gender Development and Globalization is the leading primer on global feminist economics and development Lourdes Bener a

pioneer in the field of feminist economics is joined in this second edition by Günseli Berik and Maria Floro to update the text to reflect the major theoretical empirical and methodological contributions and global developments in the last decade. Its interdisciplinary investigation remains accessible to a broad audience interested in an analytical treatment of the impact of globalization processes on development and wellbeing in general and on social and gender equality in particular. The revision will continue to provide a wide ranging discussion of the strategies and policies that hold the most promise in promoting equitable and sustainable development. The authors make the case for feminist economics as a useful framework to address major contemporary global challenges such as inequalities between the global South and North as well as within single countries, persistent poverty and increasing vulnerability to financial crises, food crises and climate change. The authors' approach is grounded in the intellectual current of feminism and human development, drawing on Amartya Sen's capability approach and focused on the importance of the care economy, increasing pressures faced by women and the failures of neoliberal reforms to bring about sustainable development, reduction in poverty, inequality and vulnerability to economic crisis.

Handbook on the International Political Economy of Gender Juanita Elias, Adrienne Roberts, 2018-02-23 This Handbook brings together leading interdisciplinary scholarship on the gendered nature of the international political economy. Spanning a wide range of theoretical traditions and empirical foci, it explores the multifaceted ways in which gender relations constitute and are shaped by global politico-economic processes. It further interrogates the gendered ideologies and discourses that underpin everyday practices from the local to the global. The chapters in this collection identify, analyse, critique and challenge gender-based inequalities whilst also highlighting the intersectional nature of gendered oppressions in the contemporary world order.

Haynes, 2005-04-21 Palgrave Advances in Development Studies aims to provide readers with an understanding of the disparate theories concerning development, their assumptions and the intellectual forces underpinning them. Feminist Global Political Economies of the Everyday Juanita Elias, Adrienne Roberts, 2018-12-07 This collection interrogates the multifaceted ways in which global transformations are constituted by deeply gendered socio-economic practices at the level of the everyday. It brings feminist insights to bear on the emerging International Political Economy (IPE) debates about the everyday, showing how gender is key to understanding how political economy is enacted and performed at the local level by non-elites and via various cultural practices. Drawing on everyday IPE and a longer standing body of feminist scholarship that documents and theorizes the mutually constitutive nature of, on the one hand, global markets and, on the other, households, families, relations of social reproduction and gendered socio-economic practices, this collection charts the lived realities of people and communities.

across a wide range of sites and spaces of the global political economy It considers how globalizing capitalism affects and is in turn affected by Argentine sex workers Nepalese private security contractors Canadian call centre workers Southeast Asian domestic workers workers and players in British bingo halls working class households in the UK and much more It demonstrates through detailed empirical research that a gender lens is crucial for understanding how and on what terms individuals and households are becoming ever more enmeshed in capitalist social relations and how they actively and creatively resist these processes The chapters originally published as a special issue in *Globalizations* [Handbook on Gender in World Politics](#) Jill Steans, Daniela Tepe-Belfrage, 2016-07-27 The Handbook on Gender in World Politics is an up to date comprehensive multi disciplinary compendium of scholarship in gender studies The text provides an indispensable reference guide for scholars and students interrogating gender issues in international and global contexts Substantive areas covered include statecraft citizenship and the politics of belonging international law and human rights media and communications technologies political economy development global governance and transnational visions of politics and solidarities *Gender and Politics* Jane H. Bayes, 2012-07-10 This timely collection offers a fresh look on the impact of gender perspectives in the discipline of political science at the beginning of the 21st century Jane Bayes combats the Eurocentric focus that has characterised both fields and suggests viable alternatives for the future of the disciplines

Berberoglu, 2010-04-12 This book examines the development and transformation of global capitalism in the late 20th and early 21st century It analyzes the dynamics and contradictions of the global political economy through a comparative historical approach based on class analysis After providing a critical overview of neoliberal capitalist globalization over the past three decades the book examines the emergence of new forces on the global scene and discusses the prospects of change in the global economy in a multi polar direction in the decades ahead The book concludes by focusing on the mass movements that are playing a central role in bringing about the transformation of global capitalism [Gender and Global Politics in the Asia-Pacific](#) B. regulations this book reveals that multiple understandings of social justice environmental sustainability and well being or ethicality exist in parallel to those institutionalized in ethical trade schemes Through an in depth case study of smallholder subsistence and French bean farming in Kenya the book grounds the analysis of livelihoods gender and ethical trade in women smallholders perspectives links the macro level of markets with the micro level of livelihoods and engenders relations of power structure and agency in food networks It brings together disparate bodies of theory to illustrate the knowledge strategies and values of women smallholder farmers that are often beyond the scope of ethical trade regulations It also provides a challenging new vision for doing food systems research
