Tax Policy, Women and the Law Ann Mumford,2010-11-04 Tax policy frequently targets the

choices that women face in many aspects of their lives. Decisions regarding working away from home, having children, marrying, registering a partnership or cohabiting with a partner all entail tax consequences. The end of the twentieth century saw progress in women's legal and social equality but many governments began to increase their reliance on the tax system as a means of influencing the choices that women make. The juxtaposition of this instrumentalist deployment of tax with persisting economic inequality for women is the starting point for this book. Employing a range of theoretical approaches and grounding its investigations in sociological theory and cultural philosophy, it provides the foundation for a comparative contextual consideration of the issues that arise at the intersection of women tax policy and the law.

Contemporary Issues and Challenges in Public Financial Management Richard Allen, Philipp Krause, 2025-04-02

Public financial management (PFM) has gone through a period of intense change since the Global Financial Crisis (GFC) of 2008-2009 and its aftermath. The implications from the GFC alongside the Covid-19 crisis, the Ukraine-Russia war and the associated energy crises have had profound implications for how countries conduct their fiscal, tax and budgetary policies. There has also been a huge growth of interest in green fiscal policy, in the challenges of income and gender inequality and in the management of public infrastructure and in digitalization. This book offers a deeper and more selective analysis of PFM topics that have either been profoundly affected by the GFC and subsequent crises or have dramatically transformed or evolved for other reasons. It discusses the extent to which these developments have led to improvements in countries' fiscal and budgetary performance. Written by top academics or practitioners in the field, this book tackles the main issues of fiscal governance and its nexus with climate change, anti-corruption and financial crisis. It will be of interest to academics, researchers, students and practitioners of public financial management and public finance.
