

Ecology

Ecology = the study of the relationships between organisms and their interactions with the environment

LEVELS OF ECOLOGICAL ORGANIZATION

Organism → population → community → ecosystem → biome → biosphere

Standards:

- Describe the levels of ecological organization (i.e., organism, populations, community, ecosystem, biome, biosphere).
- Describe characteristic biotic and abiotic components of aquatic (water) and terrestrial (land) ecosystems.

Organism - is any individual living thing.

Species - is a group of organisms so similar to one another that they can breed.

Population - one group of individuals that belong to the same species and live in the same area.

Community - the different populations that live together in a specific area.

Ecosystem - a system composed of all the living and non-living components in an environment.

Biome - is a group of ecosystems that have the same climate and similar dominant communities.

Biosphere - is all living things and the places where they exist (air, land, water).

Biotic - A term that describes a **living** factor in an ecosystem.

Abiotic - A term that describes a **nonliving** factor in an ecosystem.

Abiotic Factors = soil, sun, water, rocks, temperature, air, gases

Biotic Factors = all plants, animals, fungi, protists and bacteria

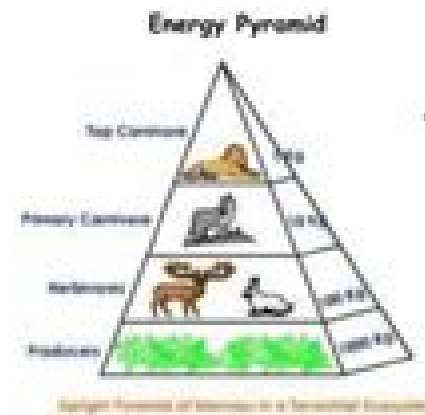

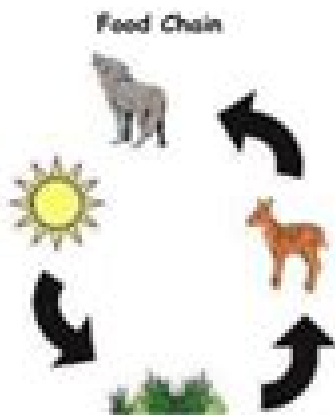

Standard:

- Describe how energy flows through an ecosystem (e.g., food chains, food webs, energy pyramids).

Food Chain - A simplified (single) path illustrating the passing of potential chemical energy (food) from one organism to another organism.

Food Web - A complex arrangement of interrelated (multiple) food chains illustrating the flow of energy between interdependent organisms.

Energy Pyramid - A model that illustrates the biomass productivity at multiple trophic levels in a given ecosystem.

- Energy is lost as you move up the energy pyramid from one trophic level to the next.
- Only 10% of the energy available within one trophic level is transferred to organisms at the next trophic level.
- There is much more energy in the producer level of a food chain than at the consumer levels.

Ecosystems And Communities Study Guide Key

J Dewey

Ecosystems And Communities Study Guide Key:

Eventually, you will totally discover a additional experience and completion by spending more cash. yet when? pull off you assume that you require to get those every needs subsequent to having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to understand even more going on for the globe, experience, some places, afterward history, amusement, and a lot more?

It is your entirely own grow old to acquit yourself reviewing habit. in the midst of guides you could enjoy now is **Ecosystems And Communities Study Guide Key** below.
