**The Education of Native and Minority Groups** Katherine Margaret Cook, Florence Evan Reynolds, 1935      **The Politics of Structural Education Reform** Keith A. Nitta, 2008-01-07 Education policymaking is traditionally seen as a domestic political process The job of deciding where students will be educated what they will be taught who will teach them and how it will be paid for clearly rests with some mix of district state and national policymakers This book seeks to show how global trends have produced similar changes to very different educational systems in the United States and Japan Despite different historical development social norms and institutional structures the U S and Japanese education systems have been restructured over the past dozen years not just incrementally but in ways that have transformed traditional power arrangements Based on 124 interviews this book examines two restructuring episodes in U S education and two restructuring episodes in Japanese education The four episodes reveal a similar politics of structural education reform that is driven by symbolic action and bureaucratic turf wars which has ultimately hindered educational improvement in both countries      *Oversight Hearing on the National Institute of Education* United States. international education Drawing on extensive theorising and empirical studies of international school leadership international school parents and pupils institutional faculty online sources and the author's own wealth of experience teaching and leading in international contexts the book investigates how this vision for education has emerged contrasting it to both how education is seen in other parts of the world and how it has been conceptualised at other historical junctures Exploring the positioning of teachers academics and educational leaders in this discursive shift chapters examine specific aspects of diversity demonstrating how they have become areas of social conflict serving to legitimise privilege in Western educational contexts while excluding other understandings of social cohesion and social inequalities The book offers a novel approach to the analysis of international education by combining sociological and linguistic elements on which to base the argument Ultimately critiquing diversity as a rhetorical device that perpetuates structural and systemic inequalities the book explores how diverse perspectives can be brought to the discussion of diversity itself and will therefore appeal to scholars postgraduate students and researchers in the fields of the sociology of education international and comparative education and higher education
