**Foucault and International Relations** Nicholas J. Kiersey, Doug Stokes, 2013-09-13 The recent debate about biopolitics in International Relations IR theory may well prove to be one of the most provocative and rewarding engagements with the concept of power in the history of the discipline Building on Foucault's arguments concerning the role

played by the concept of security in 19th century liberal government numerous IR scholars are now arguing for the relevance of his theories of biopolitics and governmentality for understanding the Global War on Terror GWOT and broader issues of security and governance in the post 9 11 world Conversely others have criticized this idea Marxist and Communitarian scholars have challenged the notion that the category of biopolitics can be scaled up to the level of international relations with any analytical precision This edited volume covers these debates in IR with a series of critical engagements with Foucault s own thought and its increasing relevance for understanding international relations in the post 9 11 world This book was based on a special issue of *Global Society* ***Cooperation Networks and Economic Development*** Andrés Cárdenas O Farrill,2021-02-11 For most Western audiences Cuba is a touristic paradise stuck in time and virtually detached from world technology networks by the US embargo anything but a hub of industrial innovation and high value added biotechnology However a closer look reveals more subtle but equally powerful stories that challenge the homogenizing assumptions of conventional economics and open up scope for more sophisticated reflections on Cuban economy and industry From this kind of enquiry emerges the case of the internationally respected Cuban biotech industry as the most successful case of science and technology policy in the country s economic history The book takes an interdisciplinary approach exploring issues such as interdependency purpose and history as natural constituencies of the innovation process It also examines the dynamic and crucial role played by the state in the formation of innovative business enterprises This book will be of interest to academic researchers in the fields of innovation and economic development

Recent Advances in Neo-Schumpeterian Economics Andreas Pyka, Horst Hanusch, 2009-01-01 This judicious selection of recent essays demonstrates the applicability of the fundamental principles of neo Schumpeterian economics namely innovation and uncertainty The authors demonstrate how neo Schumpeterian economics is developing into a comprehensive economic theory encompassing industry the public sector and financial markets Neo Schumpeterian economics has become a prolific field with a major orientation towards innovation driven industrial dynamics However a truly comprehensive neo Schumpeterian approach argues that innovation is also an important element in both the public and financial sectors For example a lack of public infrastructure or speculative bubbles in financial markets can hinder or even prevent economic development The expert contributions to this book deal with the future orientation of the subject in terms of innovative performance in the industrial financial and public sectors Recent Advances in Neo Schumpeterian Economics can be considered a first attempt to substantiate the comprehensive neo Schumpeterian approach of which Horst Hanusch has been a leading proponent This unique and path breaking book will be of great interest and value to researchers in the fields of innovation industrial economics financial markets and the public sector

*Un-making Environmental Activism* Doerthe Rosenow, 2017-11-06 Much environmental activism is caught in a logic that plays science against emotion objective evidence against partisan aims and human interest against a nature that has intrinsic value Radical activists by contrast play down the role of science in determining environmental politics but read their solutions to environmental problems off fixed theories of domination and oppression Both of these approaches are based in a modern epistemology grounded in the fundamental dichotomy between the human and the natural This binary has historically come about through the colonial oppression of other non Western and often non binary ways of knowing nature and living in the world There is an urgent need for a different decolonised environmental activist strategy that moves away from this epistemology recognises its colonial heritage

and finds a different ground for environmental beliefs and politics This book analyses the arguments and practices of anti GMO activists at three different sites the site of science the site of the Bt cotton controversy in India and the site of global environmental protest to show how we can move beyond modern colonial binaries It will do so in dialogue with Gilles Deleuze Bruno Latour Mar a Lugones and Gayatri C Spivak as well as a broader range of postcolonial and decolonial bodies of thought
