A Social Strategy Mikolaj Jan Piskorski,2016-02-23 What people get out of social media and how businesses can get more out of it Almost no one had heard of social media a decade ago but today websites such as Facebook Twitter and LinkedIn have more than 1 billion users and account for almost 25 percent of Internet use Practically overnight social media seems indispensable to our lives from friendship and dating to news and business What makes social media so different from traditional media Answering that question is the key to making social media work for any business argues Miko aj Piskorski one of the world s leading experts on the business of social media In *A Social Strategy* he provides the most convincing answer yet one backed by original research data and case studies from companies such as Nike and American Express Drawing on his analysis of proprietary data from social media sites Piskorski argues that the secret of successful ones is that they allow people to fulfill social needs that either can t be met offline or can be met only at much greater cost This insight provides the key to how companies can leverage social platforms to create a sustainable competitive advantage Companies need to help people interact with each other before they will promote products to their friends or help companies in other ways Done right a company s social media should benefit customers and the firm Piskorski calls this a social strategy and he describes how companies such as Yelp and Zynga have done it Groundbreaking and important *A Social Strategy* provides not only a story and data driven explanation for the explosion of social media but also an invaluable concrete road map for any company that wants to tap the marketing potential of this remarkable phenomenon [The American Journey](#) Joyce Oldham

Key-words-in-context Title Index ,1962 *Managing Community Resettlement* Robert Gerrits,2023-06-22 Each year millions of people are displaced from their homes and lands While international environmental and social performance standards on land access and involuntary resettlement exist no framework supporting livelihood restoration has been developed This book provides a framework that will help improve practice for those who are involved in resettlement projects and crucially improve the outcomes for the resettlement affected households and communities Evidence from the implementation of public and private sector led resettlement projects indicates that livelihood restoration is a persistent

shortcoming if not failure across these projects This book addresses this issue by re characterising the livelihood restoration objective as livelihood re establishment and development and proposes a framework for the entire resettlement process that puts livelihood considerations first The framework enables proactive identification of the potential livelihood challenges associated with each step of the resettlement process design planning execution monitoring and evaluation as well as the opportunities that resettlement project development and induced economic growth create This book is essential reading for experts in social impact assessment resettlement specialists planners administrators non governmental and civil society organisations and students of development studies and social policy **Economic and Social Survey, Jamaica** ,2013

Disasters and Economic Recovery Davia C. Downey,2021-07-05 Disasters and Economic Recovery provides perspectives on the economic issues that emerge before during and after natural disasters in an international context by assessing the economic development patterns that emerge before and after disaster This book will provide a historical overview of emergency management policy and previous responses to disasters in each country as well as the policy learning that occurred in each case leading up to the disasters under analysis The book highlights four cases New Orleans Christchurch New Zealand the Japan earthquake and tsunami and Hurricane Sandy in the Northeastern United States The book places important focus on the specific collaborative developments unique to the rebuilding of each place s economy post disaster Using time series data the book shows the emergence of new industries and job hiring patterns in the immediate aftermath as well as provides a picture of the economic performance of each country in the years following each event Looking at the economic development policies pre and post disaster readers will glean important lessons on how to build resilient economies within the disaster framework highlighting the differences in approaches to rebuilding local economies in places with varying levels of governmental capacity post disaster to inform policymakers scholars and the disaster relief community as they plan their response to future disasters **The Cordial Economy - Ethics, Recognition and**

Reciprocity Patrici Calvo,2018-05-17 This book proposes from a civil perspective such as that developed by Stefano Zamagni and a cordial perspective such as that developed by Adela Cortina orientations to design an economy in tune with what the historical moment demands Among other things this comes from encouraging institutions organisations and companies to include in their designs aspects as important for carrying out their activities as cordial reciprocity mutual recognition of the communicative and affective capacities of the linked or linkable parties public commitment and the active participation of civil society The book first shows the conceptualisation of the process of self interest as operating for one s own benefit and its inclusion in the orthodox economic model In Chapter 2 it then displays some of the logical formal and experimental limits of the axiomatic economics model to discover the possibility of building bridges between theoretical modelling and factual validation Chapter 3 demonstrates the fragility of a rationality model based on the paradigmatic figure of homo oeconomicus Chapter 4 reflects on the critical process that has identified reciprocity as a determining factor for human cooperation

turning this behaviour into a paradox in which the lack of a reasonable explanation from the selfish perspective becomes inconsistent in the predominant economic theory Chapter 5 is from a moral point of view it describes and criticises the different approaches to reciprocity observed by sociologists biologists psychologists and economists Chapter 6 analyses three mutual recognition proposals as possible foundations for human cooperation highlighting one of them cordial recognition developed by Cortina because it is more closely related to studies of reciprocity particularly the most recent contributions from the neurosciences Chapter 7 proposes cordial reciprocity as a horizon of meaning for the various approaches to reciprocity observed Chapter 8 explores the possible emergence and development of cordial goods a type of relational and communicative good that enables joint actions to take place in different contexts of human activity Chapter 9 analyses the application and implementation of cordial reciprocity at the macro meso and micro levels of the economy And finally it proposes guidelines for designing a monitoring and compliance system which based on the communication storage and processing of big data and the committed participation of stakeholders offers businesses the possibility of inspecting their underlying dimensions of morality emotions and responsibility

Social Professional Activities and the State Peter Herrmann,2007 The guiding question of this work is the following In which way if at all can we define a framework that allows a comparative view on social professional activity in an international perspective Going beyond positivist research usually means to look for qualitative standards however remaining caught by taking individual professions in a national setting from one country for granted and looking from what we know for counterparts and or partners in other countries To avoid the subsequent shortcoming of an underlying professional rigidity we face the need of developing a functional perspective focusing on the societies in which Social Professional Activities SPA emerge in their respective

particular national patterns This means however to start by defining the social as determining societies in general looking from there at different national patterns pragmatically but as well structurally the nation state will be taken as point of reference In such a perspective several current concepts have to be fundamentally questioned as far as the mainstream consensus is concerned Terms in question are in particular the social professions and social problems this is especially necessary when it comes to developing an international perspective Despite the need of looking for a general definition of the social there is in particular a more specific need for debating the understanding of different strands of activities that are in the widest sense captured as social professions for example social work community youth work nursing and care professions but as well social management and social action especially the latter pointing on the problematique of professionalisation in strictu sensu International comparative research of social professional activities does not fail primarily because of the huge variety of national regimes and regulations The actual reason is the fundamentally different point of departure expressing various national traditions of the reasoning on the state a reasoning being at the end a practical reasoning In other words we have to recur on the different national understanding of social contracts This approach allows taking a dialectical perspective in order to revisit the actual character of social professional activities It is the practical confrontation of the individual with his her environment that constitutes processes of socialisation

The Asian Infrastructure Investment Bank Tamar Gutner, 2025-02-25 In 2016 the Asian Infrastructure Investment Bank AIIB opened its doors as China's first major foray in creating and leading an international organization with global membership All major donor countries joined with the exception of the United States and Japan Today the AIIB is a medium sized multilateral development bank MDB with a global membership second only to that of the World Bank This book explains the complexity of the AIIB a liberal international organization designed by a group of state and MDB experts to reflect the existing norms and rules of development banking while at the same time it is the creation of an illiberal state that interacts with the existing order in ways that often contradict those norms and rules Gutner argues that the AIIB is largely cut from the same cloth as other MDBs and faces similar challenges and criticism However a growing contradiction between conflicting Chinese institutional strategies risks turning the AIIB into the Potemkin village of China's international development and regional governance strategies a showcase of actions that follow global norms of development banking within a larger landscape of institutions that do not The book advances our understanding of how institutional diffusion takes place in the system of MDBs and is a reminder of the importance of a nuanced approach to understanding China's institutional strategies
