Voices from the Classroom: A Celebration of Learning Vana Chiou, Lotte Geunis, Oliver Holz, Nesrin Oruç Ertürk, Fiona Shelton, 2021. *Voices from the Classroom* illustrates that teachers have a leading voice in the policies that impact their students and the profession of teaching. The aim is to provide a rich and broad view of the impact of inquiry in the classrooms from primary to higher education and to provide a window into the perspective of teachers. *Voices from the Classroom* allows us to advance this mission by identifying and then turning educators' ideas into action. The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related to student characteristics and the experiences of refugees with bullying in the educational space. All the contributions published in this book emerged from real classrooms: our teachers and researchers conducted their research by drawing on their experience as educators. We believe that these insights into everyday classrooms and the issues affecting them are crucial to making teaching and learning better. We hope they can help drive real positive change for students and teachers. **Science Education** Shamin Padalkar, Mythili Ramchand, Rafikh Shaikh, Indira Vijaysimha, 2022-07-26. The book presents key perspectives on teaching and learning science in India. It offers adaptive expertise to teachers and educators through a pedagogic content knowledge (PCK) approach. Using cases and episodes from Indian science classrooms to contextualise ideas and practices, the volume discusses the nature of science and aspects of assessments and evaluations for both process skills and conceptual understanding of the subject. It examines the significance of science education at school level and focuses on meaningful learning and development of scientific and technological aptitude. The chapters deal with topics from physics, chemistry, and biology at the middle and secondary school levels and are designed to equip student teachers with theoretical and practical knowledge, abilities about science learning, and the abilities to teach these topics along with teaching. The book draws extensively from research on science education and teacher education and shifts away from knowledge transmission to the active process of constructivist teaching-learning practices. The authors use illustrative examples to highlight flexible planning for inclusive classrooms. Based on studies on cognitive and developmental psychology, pedagogical content knowledge of science, socio-cultural approaches to learning science, and the history and philosophy of science, the book promotes an understanding of science characterized by empirical criteria, logical arguments, and sceptical reviews. With its accessible style, examples, exercises, and additional references, it will be useful for students and teachers of science, science educators, BEd and MEd programmes for education, secondary and higher secondary school teachers, curriculum designers, and developers of science. It will interest research institutes, non-governmental organisations, professionals, and public and

Inclusivity and Indigeneity in Education for Sustainable Development Behera, Santosh Kumar, Ibrahim, Atyaf Hasan, Romdhani, Faten, 2024-06-03. A major issue globally revolves around the urgent need to reshape our education system, aligning it with the ambitious Sustainable Development Goals (SDGs) set to transform the world by 2030. These goals, comprising 17 distinct objectives and 169 targets, form an ambitious agenda that seeks to recalibrate the global landscape across social, economic, and environmental dimensions. Inclusivity and Indigeneity in Education for Sustainable Development stands as a catalyst for fostering dialogue on the interconnected realms of education, indigeneity, and sustainable development. It explores the relationships between these pillars and offers a comprehensive understanding of their transformative potential. The book emphasizes the essence of inclusivity, echoing the 'No one left behind' SDG agenda, which goes beyond mere academic discourse to foster fairness and justice. Additionally, it delves into the invaluable resource of indigenous knowledge, transmitted orally across generations, and its profound connection to sustainable development. By advocating for a shift in education, the book calls for an approach that ensures no one is left behind in the teaching and learning process. This paradigm shift is envisioned as a broad civilizational project connecting with marginalized communities and tapping into their distinct cultural resources for crafting resilient and sustainable strategies.
