Institutional Literacies Stuart A. Selber, 2020-09-04 Information technologies have become an integral part of writing and communication courses shaping the ways students and teachers think about and do their work But too often teachers and other educational stakeholders take a passive or simply reactive role in institutional approaches to technologies and this means they are missing out on the chance to make positive changes in their departments and on campus Institutional Literacies argues that writing and communication teachers and program directors should collaborate more closely and engage more deeply with IT staff as technology projects are planned implemented and expanded Teachers need to both analyze how their institutions approach information technologies and intervene in productive ways as active university citizens with relevant expertise To help them do so the book offers a three part heuristic reflecting the reality that academic IT units are complex and multilayered with historical spatial and textual dimensions It discusses six ways teachers can intervene in the academic IT work of their own institutions maintaining awareness using systems and services mediating for audiences participating as user advocates working as designers and partnering as researchers With these strategies in hand educators can be proactive in helping institutional IT approaches align with the professional values and practices of writing and communication programs Spatial Data Analysis in Ecology and Agriculture Using R Richard E.
