Zanasi,Nelson F. F. Ebecken,C. A. Brebbia,2009 Since the end of the Cold War the threat of large scale wars has been substituted by new threats terrorism organised crime trafficking smuggling proliferation of weapons of mass destruction To react to them a security strategy is necessary but in order to be effective it requires several instruments including technological tools Consequently research and development in the field of security is proving to be an ever expanding field all over the world Data mining is seen more and more not only as a key technology in business engineering and science but as one of the key features in security To stress that all these technologies must be seen as a way to improve not only the security of citizens but also their freedom special attention will be given to data protection research issues The 10th International Conference on Data Mining is part of the successful series and the topics include Text mining and text analytics Data mining applications Data mining methods Intelligent Data Analytics for Terror Threat Prediction Subhendu Kumar Pani, Sanjay Kumar Singh, Lalit Garg, Ram Bilas Pachori, Xiaobo Zhang, 2021-01-12 Intelligent data analytics for terror threat prediction is an emerging field of research at the intersection of information science and computer science bringing with it a new era of tremendous opportunities and challenges due to plenty of easily available criminal data for further analysis This book provides innovative insights that will help obtain interventions to undertake emerging dynamic scenarios of criminal activities Furthermore it presents emerging issues challenges and management strategies in public safety and crime control development across various domains The book will play a vital role in improvising human life to a great extent Researchers and practitioners working in the fields of data mining machine learning and artificial intelligence will greatly benefit from this book which will be a good addition to the state of the art approaches collected for intelligent data analytics It will also be very beneficial for those who are new to the field and need to quickly become acquainted with the best performing methods With this book they will be able to compare different approaches and carry forward their research in the most important areas of this field which has a direct impact on the betterment of human life by maintaining the security of our society No other book is currently on the market which provides such a good collection of state of the art methods for intelligent data analytics based models for terror threat prediction as intelligent data analytics is a newly emerging field and research in data mining and machine learning is still in the early stage of development Intelligent Data Mining in Law Enforcement Analytics Paolo Massimo Buscema, William J. Tastle, 2012-11-28 This book provides a thorough summary of the means currently available to the investigators of Artificial Intelligence for making criminal behavior both individual and collective foreseeable and for assisting their investigative capacities The volume provides chapters on the introduction of artificial intelligence and machine learning suitable for an upper level undergraduate with exposure to mathematics and some

programming skill or a graduate course. It also brings the latest research in Artificial Intelligence to life with its chapters on fascinating applications in the area of law enforcement though much is also being accomplished in the fields of medicine and bioengineering. Individuals with a background in Artificial Intelligence will find the opening chapters to be an excellent refresher but the greatest excitement will likely be the law enforcement examples for little has been done in that area. The editors have chosen to shine a bright light on law enforcement analytics utilizing artificial neural network technology to encourage other researchers to become involved in this very important and timely field of study.
