Multidisciplinary Approaches to Neural Computing Anna Esposito, Marcos Faudez-Zanuy, Francesco Carlo Morabito, Eros Pasero, 2017-08-28 This book presents a collection of contributions in the field of Artificial Neural Networks ANNs The themes addressed are multidisciplinary in nature and closely connected in their ultimate aim to identify features from dynamic realistic signal exchanges and invariant machine representations that can be exploited to improve the quality of life of their end users Mathematical tools like ANNs are currently exploited in many scientific domains because of their solid theoretical background and effectiveness in providing solutions to many demanding tasks such as appropriately processing both for extracting features and recognizing mono and bi dimensional dynamic signals solving strong nonlinearities in the data and providing general solutions for deep and fully connected architectures Given the multidisciplinary nature of their use and the interdisciplinary characterization of the problems they are applied to which range from medicine to psychology industrial and social robotics computer vision and signal processing among many others ANNs may provide a basis for redefining the concept of information processing These reflections are supported by theoretical models and applications presented in the chapters of this book This book is of primary importance for a the academic research community b the ICT market c PhD students and early stage researchers d schools hospitals rehabilitation and assisted living centers and e representatives of multimedia industries and standardization bodies **Data Mining**

Robert Stahlbock, Gary M. Weiss, Mahmoud Abou-Nasr, Hamid Arabnia, 2015-02-04 This volume contains papers presented at The 2014 International Conference on Data Mining DMIN 14 T p verso *Proceedings of the Future Technologies Conference (FTC) 2019* Kohei Arai, Rahul Bhatia, Supriya Kapoor, 2019-10-12 This book presents state of the art intelligent methods and techniques for solving real world problems and offers a vision of future research Featuring 143 papers from the 4th Future Technologies Conference held in San Francisco USA in 2019 it covers a wide range of important topics including but not limited to computing electronics artificial intelligence robotics security and communications and their applications to the real world As such it is an interesting exciting and inspiring read *Feature Selection and Enhanced Krill Herd Algorithm for Text Document Clustering* Laith Mohammad Qasim Abualigah, 2018-12-18 This book puts forward a new method for solving the text document TD clustering problem which is established in two main stages i A new feature selection method based on a particle swarm optimization algorithm with a novel weighting scheme is proposed as well as a detailed dimension reduction technique in order to obtain a new subset of more informative features with low dimensional space This new subset is subsequently used to improve the performance of the text clustering TC algorithm and reduce its computation time The k mean clustering algorithm is used to evaluate the effectiveness of the obtained subsets ii Four krill herd algorithms KHAs namely the a basic KHA b modified KHA c hybrid KHA and d multi objective hybrid KHA are proposed to solve the TC problem each algorithm represents an incremental improvement on its predecessor For the evaluation

process seven benchmark text datasets are used with different characterizations and complexities Text document TD clustering is a new trend in text mining in which the TDs are separated into several coherent clusters where all documents in the same cluster are similar The findings presented here confirm that the proposed methods and algorithms delivered the best results in comparison with other similar methods to be found in the literature

Evolutionary Computation & Swarm Intelligence Fabio Caraffini,Valentino Santucci,Alfredo Milani,2020-11-25 The vast majority of real world problems can be expressed as an optimisation task by formulating an objective function also known as cost or fitness function The most logical methods to optimise such a function when 1 an analytical expression is not available 2 mathematical hypotheses do not hold and 3 the dimensionality of the problem or stringent real time requirements make it infeasible to find an exact solution mathematically are from the field of Evolutionary Computation EC and Swarm Intelligence SI The latter are broad and still growing subjects in Computer Science in the study of metaheuristic approaches i e those approaches which do not make any assumptions about the problem function inspired from natural phenomena such as in the first place the evolution process and the

collaborative behaviours of groups of animals and communities respectively This book contains recent advances in the EC and SI fields covering most themes currently receiving a great deal of attention such as benchmarking and tuning of optimisation algorithms their algorithm design process and their application to solve challenging real world problems to face large scale domains
