provide a more familiar environment for new generations DBAs Some of the functions normally done by DBA or console operators can now be done in this eclipse based environment by the application developers This means that the need to request these services from others can be eliminated This IBM Redbooks publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features which show an alternative way to accomplish those processes Each chapter highlights a different area of the DBA processes like PSB creation Starting stopping a database in an IMS system Recovering a database Cloning a set of databases Chief Counsel User's Guide to Automation Services United States.
