Digital Information Design (DID) Foundation Brian Johnson,Leon-Paul de Rouw,2021-03-09 Digital Information Design DID is primarily a business information management BIM model As with any model it is used to help you to describe problems and test potential solutions DID is not like any other method or framework model it is independent of any other existing model or framework and does not claim to manage the entirety of the design of business information services DID identifies useful and widely used best practices that are designed specifically for use in any phase of business information service development from idea conception specification design test handover service management and operation or managing architectural issues or hardware and software installation Primarily DID was developed to manage the quality of information and how to put it to good use The DID model has been designed for you to identify what you need and when you need it when designing business

information services and as a broad guide identifies key points in existing frameworks that are particularly useful. The model is wholly independent of all other frameworks including BiSL and BiSL Next in which the basic design is rooted. You can choose and use whatever you wish; the model will help you to assess the validity of your choices and identify strengths and weaknesses in your approach. The DID model focuses on the common languages to describe key elements of design: need and value, mission and capability, key business information, perspectives, business information, data services and technology, and the high-level domains: governance, strategy, improvement and operation that must be managed in order to effectively run any business. DID helps you to identify only what you need to ensure that business information design reflects what is needed by your enterprise. The model can be used entirely separately from the framework-level guidance discussed and it can be used at any level in the organization. The essentials of DID are explained in two books: this book, *Foundation*, and the *Practitioner* book that will be published later.
