Algorithms using Java Sally. A Goldman, Kenneth. J Goldman, 2007-08-23 Although traditional texts present isolated algorithms and data structures they do not provide a unifying structure and offer little guidance on how to appropriately select among them Furthermore these texts furnish little if any source code and leave many of the more difficult aspects of the implementation as exercises A fresh alternative to Data Structures Using Java Yedidiah Langsam, Moshe Augenstein, Aaron M. Tenenbaum, 2003 This book employs an object oriented approach to teaching data structures using Java Many worked examples and approximately 300 additional examples make this book easily accessible to the reader Most of the concepts in the book are illustrated by several examples allowing readers to visualize the processes being taught Introduces abstract concepts shows how those concepts are useful in problem solving and then shows the abstractions can be made concrete by using a programming language Equal emphasis is placed on both the abstract and the concrete versions of a concept so that the reader learns about the concept itself its implementation and its application For anyone with an interest in learning more about data structures

Data Structures and Algorithms in Java Robert Lafore, 2017-09-06 Data Structures and Algorithms in Java Second Edition is designed to be easy to read and understand although the topic itself is complicated Algorithms are the procedures that software programs use to manipulate data structures Besides clear and simple example programs the author includes a workshop as a small demonstration program executable on a Web browser The programs demonstrate in graphical form what data structures look like and how they operate In the second edition the program is rewritten to improve operation and clarify the algorithms the example programs are revised to work with the latest version of the Java JDK and questions and exercises will be added at the end of each chapter making the book even more useful Educational Supplement Suggested solutions to the programming projects found at the end of each chapter are made available to instructors at recognized educational institutions This educational supplement can be found at www.prenhall.com in the Instructor Resource Center
