Sentimental Analysis and Deep Learning Subarna Shakya,Valentina Emilia Balas,Sinchai Kamolphiwong,Ke-Lin Du,2021-10-25 This book gathers selected papers presented at the International Conference on Sentimental Analysis and Deep Learning ICSADL 2021 jointly organized by Tribhuvan University Nepal Prince of Songkla University Thailand and Ejesra during June 18 19 2021 The volume discusses state of the art research works on incorporating artificial intelligence models like deep learning techniques for intelligent sentiment analysis applications Emotions and sentiments are emerging as the most important human factors to understand the prominent user generated semantics and perceptions from the humongous volume of user generated data In this scenario sentiment analysis emerges as a significant breakthrough technology which can automatically analyze the human emotions in the data driven applications Sentiment analysis gains the ability to sense the existing voluminous unstructured data and delivers a real time analysis to efficiently automate the business processes Meanwhile deep learning emerges as the revolutionary paradigm with its extensive data driven representation learning architectures This book discusses all theoretical aspects of sentimental analysis deep learning and related topics

Lipid signaling in plants Xuemin Wang,Kent D. Chapman,2013-07-30 Cell membranes are the initial and focal sites of stimulus perception and signal transduction Membrane lipids are rich sources for the production of signaling messengers that mediate plant growth development and response to nutrient status and stresses In recent years substantial progress has been made toward understanding lipid signaling in plants but many fundamental questions remain What lipids are signaling messengers or mediators in plants How are the signaling lipids produced and metabolized In what plant cellular and physiological processes are various lipid mediators involved How do they carry out their signaling functions How do lipid signaling networks contribute to modulating plant growth development and responses to hormones and stresses In this Research Topic issue we invite the broad plant community to address the above questions Cell membranes are the initial and focal sites of stimulus perception and signal transduction Membrane lipids are rich sources for the production of signaling messengers that mediate plant growth development and response to nutrient status and stresses In recent years substantial progress has been made toward understanding lipid signaling in plants but many fundamental questions remain What lipids are signaling messengers or mediators in plants How are the signaling lipids produced and metabolized In what plant cellular
