Joshua Foer's Moonwalking with Einstein Ant Hive Media,2016-08-21 This is a summary of Joshua Foer's Moonwalking with Einstein The Art and Science Of Remembering Everything Foer's unlikely journey from chronically forgetful science journalist to U S Memory Champion frames a revelatory exploration of the vast hidden impact of memory on every aspect of our lives On average people squander forty days annually compensating for things they've forgotten Joshua Foer used to be one of those people But after a year of memory training he found himself in the finals of the U S Memory Championship Even more important Foer found a vital truth we too often forget In every way that matters we are the sum of our memories Moonwalking with Einstein draws on cutting edge research a surprising cultural history of memory and venerable tricks of the mentalist's trade to transform our understanding of human remembering Under the tutelage of top mental athletes he learns ancient techniques once employed by Cicero to memorize his speeches and by Medieval scholars to memorize entire books Using methods that have been largely forgotten Foer discovers that we can all dramatically improve our memories Immersing himself obsessively in a quirky subculture of competitive memorizers Foer learns to apply techniques that call on imagination as much as determination showing that memorization can be anything but rote From the PAO system which converts numbers into lurid images to the memory palace in which memories are stored in the rooms of imaginary structures Foer's experience shows that the World Memory Championships are less a test of memory than of perseverance and creativity Foer takes his inquiry well beyond the arena of mental athletes across the country and deep into his own mind In

San Diego he meets an affable old man with one of the most severe case of amnesia on record where he learns that memory is at once more elusive and more reliable than we might think In Salt Lake City he swaps secrets with a savant who claims to have memorized more than nine thousand books At a high school in the South Bronx he finds a history teacher using twenty five hundred year old memory techniques to give his students an edge in the state Regents exam At a time when electronic devices have all but rendered our individual memories obsolete Foer s bid to resurrect the forgotten art of remembering becomes an urgent quest Moonwalking with Einstein brings Joshua Foer to the apex of the U S Memory Championship and readers to a profound appreciation of a gift we all possess but that too often slips our minds Available in a variety of formats this summary is aimed for those who want to capture the gist of the book but don t have the current time to devour all 320 pages You get the main summary along with all of the benefits and lessons the actual book has to offer This summary is not intended to be used without reference to the original book *Moonwalk med Einstein* ,2013 **Moonwalking with Einstein** Joshua Foer,2011 Why don t some waiters need to write down orders How are the best violinists able to memorize a new score after playing it only once Why can some people commit entire books to memory while a few can only remember their most recent thought To answer these questions Joshua Foer spent a year talking to memory experts and neuroscientists savants and amnesiacs chess masters and historians of memory He learnt the principles of memory techniques from Cicero to modern day memory palaces and even undertook intense training under a Grand Master to become a US Memory Champion Looking at everything from why London cabbies brains develop differently to how Apache Indians remember landmarks Foer discovers the mechanics of memory and reveals how the brain can be exercised like any other muscle In fact he shows with the right training we can all achieve mastery of our memory Intelligent entertaining and with a cast of unforgettable characters Moonwalking with Einstein revives the long lost tradition of memory training to show us the potential of our minds *Moonwalking with Einstein* Norman Gjorn,2017-08-12 When we meet Joshua Foer his memory is nothing special A year later he is able to memorize the order of a shuffled deck of cards in less than two minutes and the names of 99 people he s just met He has also etched in his brain images of his friend urinating on Pope Benedict s skullcap of Rhea Perlman involved in indelicate acts with Manute Bol and of other things most of us would try hard to forget Let it never be claimed that there is no cost to self improvement
