One thing we noticed throughout our years of teaching is that there is a lack of good learning material for students studying for the Math Level II subject test. To remedy this we produced this book. It contains all the material you need to know to get a perfect score on the Math Level II exam. The major outlines of this book are listed below: Required Content Knowledge. In this book we divide the required content knowledge into four chapters based on the guideline provided by the College Board: Chapter One: Numbers and Operations; Chapter Two: Algebra and Functions; Chapter Three: Geometry and Measurements; Chapter Four: Data Analysis, Statistics, and Probability. Within each chapter we explore all necessary sub-concepts in depth and provide numerous practice questions mimicking those on the actual exam. Working on the problem-solving skills sections will help students build a strong sense of intuition for problem-solving and making educated guesses. Students will be very prepared after doing these practice problems to take the actual exam. Problem Solving Skills. Within each concept section the problems are grouped into three difficulty levels: Easy, Medium, Hard. The critical thinking advice, answers, and detailed explanations are located to the right of the problems. Students can refer to the answers easily but can also cover the page if they want to attempt the problem on their own. Diagnostic Test. The diagnostic test contains 50 questions on topics that are on the SAT Math Level II Subject Test. The purpose of the diagnostic test is to allow you to measure your level of proficiency and identify your weakest areas. It is important that you take this diagnostic test to find out your weakest areas and then study those areas accordingly. All of the questions in the diagnostic test are on a medium to hard level. 1500 Practice Problems and 10 Practice Tests.
